*We believe the success of applying theory in practice is largely contingent on how students define social work theory, identify the role of theory in practice, and categorize benefits and challenges in applying theory to practice. It is on this premise that this article is presented. Two datasets were used to form the students' perspectives. The first dataset is a seven year compilation of 109 undergraduate student theory papers and the second is a pre-test/post-test online survey of graduate students in an advanced social work theory course. The work offers a context for educators in teaching and helping students to apply theory in their own practices.*

### **SOCIAL WORK THEORY AND APPLICATION TO PRACTICE: THE STUDENTS' PERSPECTIVES**

As a helping profession, the primary mission of social work is to help clients meet their needs and enhance their well-being. In order to effectively respond to clients' needs and demands, professional social workers are equipped with a wide range of knowledge. However, what constitute social work knowledge base remain a major concern and a controversial issue (Trevithick, 2008). A classic debate in social work is whether theories are necessary for practice. Thyer (1994) argues that it is a waste of time for social work educators to teach theory for practice because they do not do a good job of teaching theory. He espouses that most theories in social work are taught incorrectly, and are invalid, which may lead to ineffective methods (Thyer, 1994). In contrast, Simon (1994) insists that it is crucial for social work practitioners to learn theoretical knowledge because theory can serve as an anchoring frame and a conceptual screen for case assessment, causal explanation, intervention planning, and outcome evaluation. Although this kind of expert debate provides a vehicle for scholars or educators to thoroughly discuss the role of social work theory in practice, it does not offer an opportunity for the general consumers of the outcome to express their views, especially students who are required to learn and apply theory in practice.

**Social Work Theory and Ethics** Dorothee Hölscher, Richard Hugman, Donna McAuliffe, 2023-03-17 This reference work addresses the ideas that shape social work. Much of the social work literature addresses questions of theory and ethics separately so that the body of thought that is represented in social work scholarship and research creates a distinction between them. However the differences between these categories of thought can be somewhat arbitrary. This volume goes beyond this simple separation of categories. Although it recognises that questions of theory and ethics may be addressed distinctly the connections between them can be made evident and drawn out by analysing them alongside each other. Social work's use and development of theory can be understood in two complementary ways. First theory from the social sciences and other disciplines can be applied for social work second considered systematic examinations of practice have enabled theory to be developed out of social work. These different approaches are usually referred to as theory for practice and practice theory. The advancement of social work theory occurs often through the interplay between these two dimensions through research and scholarship in the field. Similarly social work ethics draw on principles and concepts that have their roots in philosophical inquiry and also involve applied analysis in the particular issues with which social workers engage and their practices in doing so. In this way social work contributes to wider debates through advancement of its own perspectives and knowledge gained through practice. *Social Work Theory and Ethics Ideas in Practice* offers a unique approach by bringing together the complementary dimensions of theory with each other and at the same time with ethical research and scholarship. It presents an analysis of the ideas of social work in a way that enables connections between them to be identified and explored. This reference is essential reading for social work practitioners researchers policy makers academics and students as well as an invaluable resource for universities research institutes government ministries and departments major non governmental organisations and professional associations of social work.
