Frank Leslie's Illustrated Newspaper John Albert Sleicher, 1891 **Coding, Shaping, Making** Haresh Lalvani, 2023-01-31 Coding Shaping Making combines inspiration from architecture mathematics biology chemistry physics and computation to look towards the future of architecture design and art It presents ongoing experiments in the search for fundamental principles of form and form making in nature so that we can better inform our own built environment In the coming decades matter will become encoded with shape information so that it shapes itself as happens in biology Physical objects shaped by forces as well will begin to design themselves based on information encoded in matter they are made of This knowledge will be scaled and trickled up to architecture Consequently architecture will begin to design itself and the role of the architect will need redefining This heavily illustrated book highlights Haresh Lalvani s efforts towards this speculative future through experiments in form and form making including his work in developing a new approach to shape coding exploring higher dimensional geometry for designing physical structures and organizing form in higher dimensional diagrams Taking an in depth look at Lalvani s pioneering experiments of mass customization in industrial products in architecture combined with his idea of a form continuum this book argues for the need for integration of coding shaping and making in future technologies into one seamless process Drawing together decades of research this book will be a thought provoking read for architecture professionals and students especially those interested in the future of the discipline as it relates to mathematics science technology and art It will also interest those in the latter fields for its broader implications
