ouvrage retrace l'évolution de l'architecture et de l'environnement urbain montrant les premières visites du Sieur de Champlain jusqu'à la métropole postmoderne d'aujourd'hui. Cette fresque historique unique accompagnée de plus de 200 photographies en couleur et en noir et blanc s'étend sur quatre siècles. Jamais Montréal avec ses structures, ses rues, ses parcs, ses édifices publics, ses habitations, ses lieux de travail et de culte n'aura paru aussi passionnante. Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996. This bibliography cites those Canadian and foreign reference sources that describe Canadian people, institutions, organizations, publications, art, literature, languages, and history. It lists books of a general nature as well as works in the disciplines of history and the humanities. These large divisions are then broken down by subject, genre, type of document, and province or territory. Titles of national, provincial, territorial, or regional interest are included in every subject area when available. The contents of the book are indexed four ways: by name, title, French subject, and English subject. And to facilitate browsing, the major reference books, those dealing with more than one subject or a large geographical region, are also cross-referenced. Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages. Entries for unilingual works include a citation in the language of the publication and a bilingual annotation. The annotations are descriptive and provide information on the content, arrangements, and indexing of works, the availability of non-print formats, previous editions, and title changes, and related works. Canadian Reference Sources will be an invaluable reference tool for future scholars and researchers.

Competing for Excellence in Architecture Jean-Pierre Chupin, 2017-10-01. A travel guide for those in search of architectural quality, this book can be browsed in many ways. Written in a clear and concise manner by about thirty authors, it features a collection of editorials from the Canadian Competitions Catalogue (CCC), a large online digital archive open to the public since 2006. The editorials explore more than sixty Canadian architecture competitions held in the last seventy years. Especially in recent years, both public and private institutions have organized competitions across Canada, producing hundreds of architectural, urban planning, and landscape design projects. Together, these proposals, most of which remain unbuilt, constitute a fantastic treasure in our tangible and intangible common heritage. Given that competition organizers, designers, juries, and critics never operate alone, there is no doubt whatsoever that this book results from the collaboration of a myriad of people contributing to and competing for excellence in architecture. Includes 497 illustrations and analytical tables. **Analogical Thinking in Architecture** Jean-Pierre Chupin, 2023-07-27. This book provides an in-depth exploration of the rich and persistent use of analogical thinking in the built environment. Since the turn of the 21st century, design thinking has permeated many fields outside of the design disciplines. It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box. This book argues that these qualities have long been supported by analogical thinking, an agile way of reasoning in which to think the unknown through the familiar. The book is organized into four case studies; the first reviews analogical models that have been at the heart of design thinking.

representations from the 1960s to the present day the second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories
