Aurousseau,2025-10-31 First published in 1957 The Rendering of Geographical Names is a clearly presented survey of the little known borderland between linguistics and geography Works on toponymy that is on the study of place names in particular countries are numerous but works on geographical names that is on the names of places and of geographical features used in foreign languages are rare But if foreign news is to be reported in English newspapers or discussed in English books if foreign books are to be catalogued in English libraries or if foreign countries are to be shown on British maps and in British atlases the need for rational ways of rendering the names of parts of the world and of places abroad is immediate And many such names are written abroad in unfamiliar alphabets and other scripts This is an important historical reference book for students or geography      Rethinking Pain in Person-Centred Health Care Stephen Buetow,2020-12-30 This book explores how person centred health care could be refined to help persons alleviate pain related distress and construct pain as a potentially positive experience Rethinking Pain in Person Centred Health Care is a fascinating contribution to the multidisciplinary literature on person centred health care pain and ethics Traditionally Western intellectual culture has downplayed the intuitive and emotional promoting instead rational natural scientific perspectives Applied to pain an instrumental approach promotes the immediate and effective relief of pain due to the widespread suffering and expense it can cause However different persons experience pain in different ways and Buetow moves beyond a commitment to eliminate pain to exploring how benefits of pain could include creating and managing meaning from pain Rather than always looking to put pain behind them persons may flourish by moving around pain through pain into pain and above pain Buetow argues that this model depends on adopting a person centred approach to health care focusing less on the

condition of pain and more on mobilizing the persons who present with and manage pain This book will be of interest to professionals and academics researchers in the fields of psychology and psychiatry who have a special interest in people with persistent pain conditions It will also be an invaluable resource for physiotherapists chronic pain consultants in secondary care and GPs     Reports of Cases Argued and Determined in the English Courts of Common Law Great Britain.
