The Meaning Of Service:

The Meaning of Service Harry Emerson Fosdick, 1950 **Measuring Service Performance** Dr Ralf Lisch, 2014-03-28

In service societies the tertiary sector has long become the primary sector in terms of GDP and employment. Quality research and testing means better service and success in the service industries demands quality. Nonetheless, complaints about insufficient, inconsistent or bad service abound. Quality decides on success and failure. Where so much is at stake, management decisions call for systematic research and consumers look for relevant results that provide guidance in complex markets. Research into quality and customer satisfaction gets to the core of a business. However, many so-called studies hardly meet essential criteria of empirical research and deliver artefacts rather than facts. This book puts an end to common misconceptions of quality studies. *Measuring Service Performance* is an appeal for an approach to quality research that meets quality criteria itself. It is a compelling argument against widespread but rather dubious dealings with measurement data and statistics. Ralf Lisch calls for a reconsideration of the research process focussing on content instead of method and adding meaning to results. Because service excellence deserves research excellence. Written in a practical, accessible style, the book offers practitioners as well as market researchers, MBA students and others involved in the service sector a critical analysis and discussion of the essentials of Practical Research for Better Quality. Ethnic Church Meets Megachurch Prema A Kurien, 2016-10-04 Winner 2018 Section on Asia and Asian America Book Award presented by the American Sociological Association. Traces the religious adaptation of members of an important Indian Christian church, the Mar Thoma denomination, as they make their way in the United States. This book exposes how a new paradigm of ethnicity and religion and the megachurch phenomenon is shaping contemporary immigrant religious institutions, specifically Indian American Christianity. Kurien draws on multi-site research in the US and India to provide a global perspective on religion by demonstrating the variety of ways that transnational processes affect religious organizations and the lives of members both in the place of destination and of origin. The widespread prevalence of megachurches and the dominance of American evangelicalism created an environment in which the traditional practices of the ancient South Indian Mar Thoma denomination seemed alien to its American-born generation. Many of the young adults left to attend evangelical megachurches. Kurien examines the pressures church members face to incorporate contemporary American evangelical worship styles into their practice, including an emphasis on an individualistic faith and praise and worship services often at the expense of maintaining the ethnic character and support system of their religious community.

Kurien's sophisticated analysis also demonstrates how the forces of globalization from the period of colonialism to contemporary out migration have brought about tremendous changes among Christian communities in the Global South. Wide in scope, this book is a must read for an audience interested in the study of global religions and cultures. Semantic Web Services Brian Blake, Liliana Cabral, Birgitta König-Ries, Ulrich Küster, David Martin, 2012-06-28 Over the last decade a great amount of effort and resources have been invested in the development of Semantic Web Service (SWS) frameworks. Numerous description languages, frameworks, tools, and matchmaking and composition algorithms have been proposed. Nevertheless, when faced with a real world problem, it is still very hard to decide which of these different approaches to use. In this book, the editors present an overall overview and comparison of the main current evaluation initiatives for SWS. The presentation is divided into four parts, each referring to one of the evaluation initiatives. Part I covers the long established first two tracks of the Semantic Service Selection (S3) Contest: the OWL-S matchmaker evaluation and the SAWSDL matchmaker evaluation. Part II introduces the new S3 Jena Geography Dataset (JGD) cross evaluation contest. Part III presents the Semantic Web Service Challenge. Lastly, Part IV reports on the semantic aspects of the Web Service Challenge. The introduction to each part provides an overview of the evaluation initiative and overall results for its latest evaluation workshops. The following chapters in each part, written by the participants, detail their approaches, solutions, and lessons learned. This book is aimed at two different types of readers. Researchers on SWS technology receive an overview of existing approaches in SWS with a particular focus on evaluation approaches. Potential users of SWS technologies receive a comprehensive summary of the respective strengths and weaknesses of current systems and thus guidance on factors that play a role in evaluation. Clifford [and others], Baptist union, 1896 Reports of Cases Decided by the English Courts Nathaniel Cleveland Moak, 1879 Worship at the Next Level Tim Dearborn, Scott Coil, 2015-06-01 Worship at the Next Level explores why and how we worship as individuals and communities. Its diverse voices offer an interdisciplinary approach for worship leaders, pastors, musicians, and those involved in contemporary worship planning in churches, colleges, and youth groups. A key emphasis on understanding theology, culture, and leadership helps provide a well rounded approach for anyone with a passion for worship.
