last decade This book is a concise presentation of the fundamentals applications and methods of optimization of polymeric

drugs and polymeric drug delivery systems for medicinal purposes The basic rationale for the use of polymeric drugs and

polymer delivery systems is the possibility to alter the pharmacokinetics and pharmacodynamics of therapeutic agents so as

to maintain an adequate therapeutic environment at the site of disfunction for an extended period of time The primary

objectives for using polymeric drugs and polymeric drug delivery systems are to introduce new and efficient methods of drug

administration to improve efficacy and patient compliance to decrease toxicity and to ensure safety The following factors

influence the design and performance of polymers for medicinal applications disease drug properties type of therapy acute or

chronic physiology of the patient administration route and the site requiring therapy     *Directory of Published Proceedings*
