Institutions and the Evolution of Modern Business Mark Casson, Mary B. Rose, 1998 The nine contributions in this volume attempt to demonstrate the applications of institutional theory to business history and show how the wider study of the institutional environment is inseparable from the study of business Contributions include an evaluation of community structure and competitive advantage within the Yorkshire woolen industry a comparative view of financial reconstruction and industrial reorganization in British and Swedish institutions during the Inter War period and post war strategic capitalism in Norway Paper edition unseen 19 50 Distributed by ISBS Annotation copyrighted by Book News Inc Portland OR **Federal**

Solomon's Knot Robert D. Cooter, Hans-Bernd Schäfer, 2011-12-27 Why law is critical to innovation and economic growth Sustained growth depends on innovation whether it's cutting edge software from Silicon Valley an improved assembly line in Sichuan or a new export market for Swaziland's leather Developing a new idea requires money which poses a problem of trust The innovator must trust the investor with his idea and the investor must trust the innovator with her money Robert Cooter and Hans Bernd Sch fer call this the double trust dilemma of development Nowhere is this problem more acute than in poorer nations where the failure to solve it results in stagnant economies In Solomon's Knot Cooter and Sch fer propose a legal theory of economic growth that details how effective property contract and business laws

help to unite capital and ideas They also demonstrate why ineffective private and business laws are the root cause of the poverty of nations in today s world Without the legal institutions that allow innovation and entrepreneurship to thrive other attempts to spur economic growth are destined to fail
