The greatest drivers of change over the last 50 years

On land and in freshwater:

- Agricultural management
- Climate change

At sea and around our coasts:

- Unsustainable fishing
- Climate change
- Marine development

These drivers continue from

centuries of habitat loss, development and persecution.

The UK is one of the most nature depleted countries on Earth.

The UK's ambitious targets to address nature loss:

- Improve species status
- Increase nature-friendly farming, fisheries and forestry
- Expand and manage protected areas
- Increase ecosystem restoration
- Co-ordinate our response to the nature and climate crises

Large-scale restoration projects, such as

Return of the State of War Dario Battistella, 2008-03-01 On 18 March 2003 the United States attacked Iraq during Operation Iraqi Freedom On 16 January 1991 the US had attacked Iraq during Operation Desert Storm The two wars were radically different Whereas Operation Desert Storm had been launched with the hope that a new world order might emerge Operation Iraqi Freedom signified the return of an imperial America unilaterally resorting to preventive warfare representative of a Hobbesian conception of international politics Why did the promise of a privileged resort to peaceful inter state conflict resolution implied during the first Gulf War give way to the explicit triumph of the might is right principle during the second Gulf War Is the shift in America s foreign behaviour but a mere parenthesis or potentially the first stage of a long term process likely to undermine the currently prevailing Lockean anarchy This book aims to answer some of these questions

The Origins of War Matthew A. Shadle, 2011-03-10 Debate rages within the Catholic Church about the ethics of war and peace but the simple question of why wars begin is too often neglected Catholics assumptions about the causes of conflict are almost always drawn uncritically from international relations theory a field dominated by liberalism realism and Marxism which is not always consistent with Catholic theology In *The Origins of War* Matthew A Shadle examines several sources to better understand why war happens His retrieval of biblical literature and the teachings of figures from church tradition sets the course for the book Shadle then explores the growing awareness of historical consciousness within the Catholic tradition the way beliefs and actions are shaped by time place and culture He examines the work of contemporary Catholic thinkers like Pope John Paul II Jacques Maritain John Courtney Murray Dorothy Day Brian Hehir and George Weigel In the constructive part of the book Shadle analyzes the movement within international relations theory known as constructivism which proposes that war is largely governed by a set of socially constructed and cultural influences Constructivism Shadle claims presents a way of interpreting international politics that is highly amenable to a Catholic worldview and can provide a new direction for the Christian vocation of peacemaking **Laws of Nature** Friedel

This book makes the unconventional claim that all of the rights in the U S Constitution are unified since they are derived from the same sources Using the U S Supreme Court s controversial decision of *Kelo v City of New London* to explore one of the most important constitutional questions of our time this book reaches across disciplines and subfields to bring forth an innovative understanding of rights The book derives its understanding of rights from historical sources and philosophical texts which then serve as the basis for the empirically backed claim that rights in U S have been sacrificed for partisan gain and that the unbiased protection of rights is the only manner in which a free and equitable government and economy can be sustained Given the theoretical and practical implications of the property rights debate understanding it is important for everyone in the U S and abroad
