Statements and Avowals George G. Haydu, Miklós Radnóti, 1973 **Moore's Paradox** Ulla Schmid, 2014-10-29

Representationalism grasps the meaning and grammar of linguistic expressions in terms of reference that is as determined by the respective objects concepts or states of affairs they are supposed to represent and by the internal structure of the content they articulate As a consequence the semantic and grammatical properties of linguistic expressions allegedly reflect the constitution of the objects they refer to Questions concerning the meaning of particular linguistic expressions are supposed to be answerable by investigating the metaphysics of the corresponding phenomena Accordingly questions of the meaning of psychological concepts are turned into questions of the nature of psychological states Concerned with Moore's Paradox representationalist approaches lead into an investigation of the state of affairs supposedly described by Moore's paradoxical assertions and thus eventually into investigations concerning the metaphysics of belief This book argues that this strategy necessarily yields both a wrong solution to Moore's Paradox and an inadequate conception of the meaning of the expression I believe Turning to the metaphysics of belief is of no use when it comes to understanding either the meaning of the expression I believe or the logic of avowals of belief Instead it proposes to focus on the role they play in language the ways in which they are used in practice **Religion and History** David Gary Shaw, 2006 *Critical Essays* , **The**

Speaking My Mind Dorit Bar-On, 2004-11-18 Dorit Bar-On develops and defends a novel view of avowals and self-knowledge Drawing on resources from the philosophy of language the theory of action epistemology and the philosophy of mind she offers original and systematic answers to many long-standing questions concerning our ability to know our own minds We are all very good at telling what states of mind we are in at a given moment When it comes to our own present states of mind what we say goes an avowal such as I'm feeling so anxious or I'm thinking about my next trip to Paris it is typically supposed tells it like it is But why is that Why should what I say about my present mental states carry so much more weight than what others say about them Why should avowals be more immune to criticism and correction than other claims we make And if avowals are not based on any evidence or observation how could they possibly express our knowledge of our own present mental states Bar-On proposes a Neo-Expressivist view according to which an avowal is an act through which a person directly expresses rather than merely reports the very mental condition that the avowal ascribes She argues that this expressivist idea coupled with an adequate characterization of expression and a proper separation of the semantics of avowals from their pragmatics and epistemology explains the special status we assign to avowals As against many expressivists and their critics she maintains that such an expressivist explanation is consistent with a non-deflationary view of self-knowledge and a robust realism about mental states The view that emerges preserves many insights of the most

prominent contributors to the subject while offering a new perspective on our special relationship to our own minds

Mind, Self and Interiority Thomas Duddy, 2017-07-05 Contemporary philosophers of mind often raise serious questions around the concepts of self subjectivity and the inner life on the grounds that such concepts have their origin in a discredited Cartesian metaphysics The contention of this book is that the rejection of interiority and related concepts has been based on a time honoured misreading of Descartes In the course of exposing the misconceived anti Cartesianism of a wide range of thinkers from Wittgenstein and Ryle to Dennett and Foucault an attempt is made to clear a space for a new post Cartesian conception of subjectivity a conception of subjectivity which is consistent with at least some versions of materialism The aim of this book is not to defend Cartesian dualism but to reclaim important concepts that have been anathematized by having been mistakenly associated with it

Transparency and Self-Knowledge Alex Byrne, 2018-04-19 Alex Byrne sets out and defends a theory of self knowledge knowledge of one's mental states Inspired by Gareth Evans discussion of self knowledge in his *The Varieties of Reference* the basic idea is that one comes to know that one is in a mental state M by an inference from a worldly or environmental premise to the conclusion that one is in M Typically the worldly premise will not be about anything mental The mind on this account is transparent self knowledge is achieved by an outward glance at the corresponding tract of the world not by an inward glance at one's own mind Belief is the clearest case with the inference being from p to I believe that p One serious problem with this idea is that the inference seems terrible because p is at best very weak evidence that one believes that p Another is that the idea seems not to generalize For example what is the worldly premise corresponding to I intend to do this or I feel a pain Byrne argues that both problems can be solved and explains how the account covers perception sensation desire intention emotion memory imagination and thought The result is a unified theory of self knowledge that explains the epistemic security of beliefs about one's mental states privileged access as well as the fact that one has a special first person way of knowing about one's mental states peculiar access
