Statistical Orbit Determination:

Statistical Orbit Determination Bob Schutz, Byron Tapley, George H. Born, 2004-06-26 Statistical Orbit Determination presents fundamentals of orbit determination from weighted least squares approaches Gauss to today's high speed computer algorithms that provide accuracy within a few centimeters Numerous examples and problems are provided to enhance readers understanding of the material Covers such topics as coordinate and time systems square root filters process noise techniques and the use of fictitious parameters for absorbing un modeled and incorrectly modeled forces acting on a satellite Examples and exercises serve to illustrate the principles throughout each chapter Statistical Orbit Determination Elsevier Science & Technology, 2004-06

Least Squares Solutions in Statistical Orbit Determination Using Singular Value Decomposition Patrick M. Marshall, 1999-06-01 This thesis is a partial analysis of the Naval Space Command statistical orbit determination algorithms Through a process called Differential Correction data from space surveillance radar observation stations is synthesized with previously accumulated element sets to maintain accurate orbital object position information Differential Correction is a nonlinear least squares process employing statistical techniques to minimize the residual measurement error thereby increasing relative position information accuracy This study focuses specifically on the algorithmic methods of solution to the systems of normal equations generated by the Differential Correction process A comparison and analysis of the present Naval Space Command method and the singular value decomposition method is presented Algorithmic constructions are presented for both methods and problematic areas are highlighted The principal focus herein is to demonstrate the benefit of singular value decomposition when attempting to solve systems of equations whose coefficient matrices are dense and nearly singular These results generalize to commonly employed normal equation solution algorithms and are intended for further study and possible incorporation by Naval Space Command as part of future modernization plans

Tracking Programs and Orbit Determination, 1960 *Filtering theory applied to near-earth satellite orbit determination* Masaaki Murata, 1978 Orbit Determination and Statistical Study of Visual Binaries Mohamed Nouh, 2013 The determination of visual binary orbits is the problem of computing orbital elements of a binary from a set of observed positions There are several methods of orbit computations and they fall into two categories namely geometrical methods and analytical methods The firsts are quicker but lead to fewer certain values of the elements About 60 to 80 orbits are computed each year throughout the world More than half are improvements of former orbits Of the 800 or 900 orbits now published only a few score have definitive elements The reasons for this difficulty beside the errors in the measures are

- 1 The lack of existing orbit determination algorithms that can deal with what we call it extreme cases of visual binary orbits like for examples parabolic orbits hyperbolic orbits quasi parabolic orbits and others So the determination of these orbits will certainly increases the available orbital elements
- 2 Three observations necessary and sufficient data for orbit determination may define a possible empty set of Keplerian orbits whose corresponding apparent orbits pass through those points

Accurate Orbit Determination and Observations of High Earth Satellites for Geodynamics Antonio Elife, Paul Pâquet, 1995 Satellite Orbits Oliver Montenbruck, Eberhard Gill, 2000-06-15 This modern presentation guides readers through the theory and practice of satellite orbit prediction and determination Starting from the basic principles of orbital mechanics it covers elaborate force models as well as precise methods of satellite tracking The accompanying CD ROM includes source code in C and relevant data files for applications The result is a powerful and unique spaceflight dynamics library which allows users to easily create software extensions An extensive collection of frequently updated Internet resources is provided through WWW hyperlinks **Precise GPS Orbit Determination for the Earth Crustal Movement Study in the Southwestern Pacific Region** Da Kuang, 1995 **Determination of Satellite Orbits from Radar Data** W.
