Knowledge Society vs. Knowledge Economy S. Sörlin, H. Vessuri, 2007-02-05

A new collection in the IAU Issues in Higher Education Series that deals with the major tensions between education and science. Drawing on experiences from a range of countries and regions, the book demonstrates the need to find new avenues for the management of knowledge production to ensure that it can meet

increasingly global goals and demands.

Statistics Joseph F. Healey, 1996

Healey knows social research statistics thoroughly and he also knows how deeply students fear it. This Fourth Edition delivers an effective balance of conceptual and practical approaches to statistics in language that truly communicates with students. Healey covers basic statistical concepts and techniques in a step by step manner, continually emphasizing the underlying logic and the social research contexts that make sense of it all. In the process, students get plenty of unthreatening exposure to the usually challenging task of statistical interpretations.

Mitigating Bias in Machine Learning Carlotta A.

Berry, Brandeis Hill Marshall, 2024-10-18

This practical guide shows step by step how to use machine learning to carry out actionable decisions that do not discriminate based on numerous human factors including ethnicity and gender. The authors examine the many kinds of bias that occur in the field today and provide mitigation strategies that are ready to deploy across a wide range of technologies, applications and industries. Edited by engineering and computing experts, *Mitigating Bias in Machine Learning* includes contributions from recognized scholars and professionals working across different artificial intelligence sectors. Each chapter addresses a different topic and real world case studies are featured throughout, highlighting discriminatory machine learning practices and clearly showing how they were reduced.

Mitigating Bias in Machine Learning addresses Ethical and Societal Implications of Machine Learning, Social Media and Health Information Dissemination, Comparative Case Study of Fairness Toolkits, Bias Mitigation in Hate Speech Detection, Unintended Systematic Biases in Natural Language Processing, Combating Bias in Large Language Models, Recognizing Bias in Medical Machine Learning and AI Models, Machine Learning Bias in Healthcare, Achieving Systemic Equity in Socioecological Systems, Community Engagement for Machine Learning.

The Data Warehouse Challenge Michael H. Brackett, 1996-07-27

Information Technology Database Management: the definitive source for understanding modern data architecture. Other books have bits and pieces of architecture described, but nowhere else is there a single source that has all the components of

modern data architecture in one place in an organized and readable manner From the Foreword by William H Inmon The technology for compiling data has evolved to the point where most organizations now amass information faster than they can use it The bad news is that most of that data is disparate scattered across different databases and platforms The time has come to tame the data chaos and this invaluable resource shows you how Michael H Brackett schools you in a variety of techniques for creating a cohesive data structure that everyone in your organization can use Step by step he guides you through the entire process of planning building and programming a data warehouse tailored to your organization's needs You learn how to Prepare and evaluate existing data for a data warehouse Cross reference data so it's easy to find in all corporate locations Prepare data for client server systems Improve the consistency and quality of existing and future data Manage a data warehouse The Data Warehouse Challenge is an indispensable tool for database administrators and developers systems programmers and analysts and all those involved with helping their organizations rise to the challenge of taming data chaos
