**Statistical methods for social workers**

Wayne McMillen,1963 **Statistics in Social Work** Amy Batchelor,2019-11-19 Understanding statistical concepts is essential for social work professionals It is key to understanding research and reaching evidence based decisions in your own practice but that is only the beginning If you understand statistics you can determine the best interventions for your clients You can use new tools to monitor and evaluate the progress of your client or team You can recognize biased systems masked by complex models and the appearance of scientific neutrality For social workers statistics are not just math they are a critical practice tool This concise and approachable introduction to statistics limits its coverage to the concepts most relevant

to social workers Statistics in Social Work guides students through concepts and procedures from descriptive statistics and correlation to hypothesis testing and inferential statistics Besides presenting key concepts it focuses on real world examples that students will encounter in a social work practice Using concrete illustrations from a variety of potential concentrations and populations Amy Batchelor creates clear connections between theory and practice and demonstrates the important contributions statistics can make to evidence based and rigorous social work practice     *Index of NLM Serial Titles* National Library of Medicine (U.S.),1979 A keyword listing of serial titles currently received by the National Library of Medicine
