of America's cities took a more pragmatic approach. Despite these differences Clapp finds a common maternalist approach that distinguished women reformers from their male counterparts. Women were more willing to use the state to deal with wayward children whereas men were more commonly involved as supporters of women reformers' initiatives rather than being themselves the initiators of reform. Firmly located in the context of recent scholarship on American women's history, *Mothers of All Children* has broad implications for American women's political history and the history of the welfare state.
