Research Methods in Urban and Regional Planning Xinhao Wang,Rainer Hofe,2008-09-02 Urban and regional planners develop and evaluate plans for communities the places we live work interact and entertain on a daily basis Their responsibilities require skills of retrieving analyzing and presenting data One of the required courses in all planning programs is planning methods While teaching such a course we feel the need for a text book that provides an up to date introduction to the fundamental methods related to planning and human services delivery In specific this book describes methods used in four areas demographic analysis economic analysis land use analysis and transportation analysis Many people have been helpful and supportive throughout this endeavor Up front are our families who understood and supported us during the period Andrea Yang Rainer s wife and also a planner edited various chapters David Edelman and Wolfgang Preiser provided suggestions for the content of this book and excellent insights and guidance whenever we asked for We are grateful for the release time that David Edelman the School Director gave us on behalf of the entire School of Planning faculty We would like to thank Dr Stefan Rayer Dr Chen Ping Yang and Dr Zhongren Peng who took time from their busy schedule to review various chapters Dr Rayman Mohamed used some preliminary chapters in his planning methods class and gave us valuable feedback Their comments and suggestions significantly improved the book *Traditional Ecological Knowledge* International Program on Traditional Ecological Knowledge,International Development Research Centre (Canada),1993 Traditional Ecological Knowledge Concepts and cases **Introduction to the Land Management Information Center (LMIC)** Land Management Information Center (Minn.),1984 **Final Report on Peat Program** Midwest Research Institute (Kansas City, Mo.). Public Affairs Information Service Bulletin ,1974 *The Changing American Countryside* Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery

Castle offers The Changing American Countryside a volume that will forever change how we look at this important subject. Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands. These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty, industry, the environment, education, family, social problems, ethnicity, race, religion, gender, government, public policy, and regional diversity. The authors are especially effective in demonstrating why rural America is so much more than just agriculture. It is in fact highly diverse, complex and interdependent with urban America and the international market place. Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections. To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural. Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life.
