Dorman, 2017-01-28 This volume presents the history of marine fog research and applications and discusses the physical processes leading to fog's formation, evolution, and dissipation. A special emphasis is on the challenges and advancements of fog observation and modeling as well as on efforts toward operational fog forecasting and linkages and feedbacks between marine fog and the environment. *Meteorology Today* C. Donald Ahrens, Peter Lawrence Jackson, Christine E. O. Jackson, 2012 *Meteorology Today* 1st Canadian edition is the first textbook of its type written specifically with the needs of the Canadian market and its unique meteorological environment in mind. This first Canadian edition builds upon the tried and tested strengths of the Ahrens *Meteorology* series and provides a more relevant resource for Canadian students and instructors by ensuring that Canadian content, practices, conventions, and examples are used throughout. An Earth Systems feature, the first of its kind in Ahrens, has been developed for this edition, presenting the interconnectedness of elements and providing a peek at the chapter content. This visual table of contents highlights the Earth system components reflected in each chapter: the atmosphere, hydrosphere, cryosphere, lithosphere, biosphere, and anthrosphere. The relationships between the chapter's content and Earth systems are further expanded upon in the introduction of each chapter. **Meteorological Series.
