Biochemistry and Cell Biology, 2009 **Remediation in Medical Education** Adina Kalet, Calvin L. Chou, 2023-08-22

On a daily basis health professions educators struggle to find effective and respectful ways of working with trainees who struggle to meet standards most of whom will become practicing clinicians. Society allows and expects the health professions to regulate ourselves and we must do so. The first edition of this book concentrated on medical student learners mainly in the United States. Since then the literature has exploded offering a wider range of remediation practices for all levels of learners in all health professions throughout the world. This new edition continues to offer evidence based theory informed and pragmatic approaches to identifying and remediating trainees who cannot yet perform to standards. Illustrative case studies frame practical and programmatic advice from experienced front line educators. All original chapters have been updated and there are 21 brand new chapters. Of the 73 chapter authors 52 are new to this edition broadening the book's relevance internationally and across the health professions. This book is required reading for all those committed to ensuring health professionals are ready and able to serve the health of the public.

Generation and Interpretation of Morphogen Gradients James Briscoe, Peter Anthony Lawrence, Jean-Paul

Vincent, 2010 Signalling by morphogens such as the Hedgehog family, Notch, Wingless, Wnt and various growth factors is essential during embryogenesis. The establishment of concentration gradients of these morphogens plays a key role during developmental patterning in all multicellular organisms, assuring that distinct cell, tissue types and organs appear at the right place in the right time during embryogenesis. Regulation of morphogen synthesis, trafficking and diffusion are all known to play a part in setting up these gradients and a complex web of signaling mechanisms ensures that specific responses occur at the correct threshold concentration in the recipient cells whose fate depends on these morphogens.
