professionalization in this time period Cheap and Tasteful Dwellings thoroughly explores the results of these competitions conducted over a thirty year period from 1879 to 1909. The book outlines the philosophy behind and procedures developed for running the competitions. It looks at characteristics of the eighty six winners of the competitions, examines the nature of architectural practices during the period, analyzes the winning competition designs and provides biographical details of competition winners and losers. A landmark book in architectural history, Cheap and Tasteful Dwellings makes a compelling case for the theory of convenient arrangement, its history, its role, its principles, its relationship to contemporary interior design education and its meaning to American architecture. More importantly, the book explains the impact of Carpentry and Building's contests in furthering the tenets of convenient arrangement for house design. By using extensive material from the magazine Jennings leaves little doubt as to how important this overlooked story is to the history of American architecture as a whole.     Engineering News and American Contract Journal ,1893     Power ,1893     **Machinery** ,1898
