Fundamentals of EU VAT Law Ad van Doesum, Herman van Kesteren, Simon Cornelje, Frank Nellen, 2025-02-19 Value added tax VAT is responsible for generating almost EUR 1200 billion per year in tax revenues across the European Union. Revenues that play a huge role in budgetary policymaking in the Member States. This extremely useful book provides not only a thorough description of the current state of EU VAT law but also a detailed explanation of the system's rationale and its legislative provisions. It puts the elements of the system in perspective and shows how they are linked to each other. The focus lies on the rules which can be deduced from the sources of EU VAT law and on their application in practice. The systematic presentation covers such issues and topics as the following: sources of EU VAT law including principles derived from CJEU case law; principles underlying the EU VAT system; relations among the layers of VAT law; primary and secondary EU law; national law; how to apply the VAT legislation and case law; allocation of taxing rights; place of supply; rules of invoicing; requirements and other administrative obligations; exemptions; the taxable amount; and the new VAT rates structure; the right of deduction of input VAT; intra-Community transactions; importation and exportation; e-commerce; distance sales rules; platforms and the one-stop-shop mechanism; immovable property holding companies and dealings in shares; and how far a national court must and can go in interpreting national provisions in light of the VAT Directive and the principles underlying the VAT system. The book follows the structure of the VAT Directive's VAT determination scheme with additional topical chapters on immovable property, intra-Community transactions, importation and exportation of goods and shares, and other securities. With its detailed attention to the meaning and interpretation of the most prominent legislative provisions and court rulings, this book serves as an incomparable guide for practitioners. Its emphasis on the rationale and systematics of the EU VAT system and abundance of references to case law and literature make it an indispensable reference for all tax law professionals including legislators, judges, and researchers.

Kids Count Data Book, 2018 Tech Wars Daniel M. Gerstein, 2022-09-13 This book explores the evolution of the current U.S. research and development enterprise and asks whether this organization remains appropriate to the challenges we face today and proposes strategies for better preparing for the global technology race shaping our future. Across the globe, nation states and societies as well as corporations, technology developers, and even individuals find themselves on the front lines of a global technology race. In the third decade of this century, the outlines of the contest have become clear: R&D spending, new methods such as innovation centers, and powerful technologies in governments and society are rapidly proliferating. Technology winners and losers are emerging. How did we arrive at this global technology fight? How and where will it be waged? What can we do to prepare for the future? Tech Wars
