Shipping on the Thames & the Port of London During the 1940s-1980s Malcolm Batten,Reg Batten,2022-05-05

During the 1970s and 1980s the Port of London and shipping on the River Thames was in a state of transition New methods of cargo handling in particular the introduction of containers and Roll on Roll off vehicle ferries called for new investment and a rethink on the way dock traffic was traditionally managed As a result The Port of London Authority decided to run down and close the various London docks and concentrate all new investment downriver at their Tilbury docks These photographs along with some from earlier decades and mostly previously unpublished are a fascinating insight into this period when traditional ships and cargo handling methods worked alongside the new technology Ships designed for carrying cargo in their holds were sometimes adapted to carry containers as deck cargo There were also shipping types now lost to

history including colliers and sludge boats Not forgotten are the passenger ships cruise liners to ferries The various vessels that serviced the port from tugs to salvage craft and floating cranes Finally the heritage craft from traditional Thames Sailing barges to former paddle steamers now adapted as floating pub restaurants
