# The Pretext

**Alexandre Dumas**

## **The Pretext:**

*Poetics of the Pretext* Roland-François Lack, 1998 *Poetics of the Pretext* is an original study of the French poet Lautréamont 1846-1870 who was rediscovered by the Surrealists in the 1920s and promoted to the vanguard of theoretical debate by the Telquelists of the 1960s but whose work has remained largely ignored or misinterpreted beyond a small circle of enthusiasts *Poetics of the Pretext* analyses closely the texts, pretexts and intertexts of this innovative poet bringing *Les Chants de Maldoror* and *Poésies* to the foreground of contemporary critical debates around poetics, genre, intertextuality and influence This book will make a major contribution to our understanding not only of the work of Lautréamont but also to the function of originality, imitation and plagiarism in the nineteenth century *Partnerships in Education* Kathrin

Ottrel-Cass, Karen J. C. Laing, Janet Wolf, 2022-05-30 This book contains a series of unique international contributions that explore risk in partnerships involving education Presenting a range of theoretical, methodological and practical perspectives, the book discusses aspects such as the role of motivation, leadership, process and context in such partnerships and provides examples of research methods for examining them It illuminates the different histories and disciplinary backgrounds of partners showing that risk can reside in the different expectations, understandings and interpretations that each partner brings to educational partnerships The eighteen chapters discuss critical examinations of educational partnerships from very different perspectives including formal learning institutions and community partners and include the voices from children, students, teachers and policy makers The book provides insights for everyone who is considering the challenges that can arise in partnerships and will be useful for researchers at different levels and those who are planning to forge new partnerships or think about what may present itself to be a challenge and how to address and overcome such challenges **Machine**

**Vision and Machine Learning for Plant Phenotyping and Precision Agriculture** Huajian Liu, Zhanyou Xu, 2024-01-18 Plant phenotyping (PP) describes the physiological and biochemical properties of plants affected by both genotypes and environments It is an emerging research field that is assisting the breeding and cultivation of new crop varieties to be more productive and resilient to challenging environments Precision agriculture (PA) uses sensing technologies to observe crops and then manage them optimally to ensure that they grow in healthy conditions, have maximum productivity and have minimal negative effects on the environment Traditionally, the observation of plant traits heavily relies on human experts which is labor intensive, time consuming and subjective Automatic crop traits measurement in PP and PA are two different fields but they share the same sensing and data processing technologies in many respects Recently driven by computer and sensor technologies, machine vision (MV) and machine learning (ML) have contributed to accurate, high throughput and nondestructive plant phenotyping and precision agriculture However, these technologies are still in their infant stage and there are many challenges and questions related to them that still need to be addressed The goal of this Research Topic is to provide a platform to share the latest research results on the application of MV and ML for PP and PA It aims to highlight cutting edge

technologies bottle necks and future research directions for MV and ML in crop breeding crop cultivation disease management weed control and pest control      ICCWS 2020 15th International Conference on Cyber Warfare and Security
