**The Private Self** Arnold H. Modell, 1993 The concept of the self is the subject of intense debate in psychoanalysis as it is in neuro science cognitive science and philosophy In *The Private Self* Arnold Modell a leading thinker in American psychoanalysis studies selfhood from the inside by examining variations on the theme of the self in Freud and in the work of object relations theorists self psychologists and neuro scientists His significant contribution is an interdisciplinary perspective in formulating a theory of the private self Modell contends that the self is fundamentally paradoxical in that it is both dependent and autonomous dependent upon social affirmation but autonomous in generating itself from within we create ourselves by selecting values that are endowed with private meanings Modell presents an extensive view of these self generative and self creative aspects The private self is an embodied self the psychology of the self is rooted in biology By thinking of the unconscious as a neurophysiological process and the self as the subject and object of its own experience Modell is able to explain how identity can persist in the flux of consciousness In arriving at his unique synthesis of psychoanalytic observations and neurobiological theory Modell draws on the contributions of Donald Winnicott in psychoanalysis William James in philosophy and Gerald Edelman in neurobiology *The Private Self* boldly explores the frontier between psychoanalysis and biology In replacing the instinct driven self and the attachment oriented self with the self generating self the author offers an exciting and original perspective for our understanding of the mind and the brain

Public Self and Private Self Roy F. Baumeister, 2012-12-06 Psychology has worked hard to explore the inner self Modern psychology was born in Wundt's laboratory and Freud's consulting room where the inner self was pressed to reveal some of its secrets Freud in particular devoted most of his life to exploring the hidden recesses inside the self hidden even from the conscious mind he said From Freud's work right down to the latest journal article on self schemata or self esteem psychologists have continued to tell us about the inner self More recently psychology has turned some of its attention to the outer self that is the self that is seen and known by other people Various psychologists have studied how the outer self is formed impression formation how people control their outer selves impression management and so forth But how is the outer self related to the inner self There is an easy answer but it is wrong The easy answer is that the outer self is mostly the same as the inner self Put another way it is that people reveal their true selves to others in a honest and straightforward fashion and that others accurately perceive the individual as he or she really is Sometimes it works out that way but often it does not The issue is far too complex for the easy answer *Governing the Soul* Nikolas S. Rose, 1999 *Governing the Soul* is now widely recognized as one of the founding texts in a new approach to analyzing the links between political power expertise and the self This governmentality perspective has had important implications for a range of academic disciplines including criminology political theory sociology and psychology and has generated much theoretical innovation and empirical investigation The second edition contains a new introduction which sets out the methodological and conceptual bases of this

approach Also a new final chapter has been added that considers some of the implications of recent developments in the government of subjectivity

*Global Justice and Consecutive Constructivism* Joon H. Chung, 2016-04-26 Consecutive constructivism is a moral and political theory which mitigates structural injustice by securing individuals perception of private morality that is inventing procedural devices to make people enhance their moral consciousness and at the same time encourages people to voluntarily concern themselves with procedural justice and public morality The crucial reason for this position is that a detouring method of not directly dealing with the problem of justice but rather discussing the problem of morals is required to avoid the lucid criticisms of statist that the sovereign ruling states with authority or the world government does not exist This book suggests a new approach to the problem of global justice termed here consecutive constructivism It provides a way of coping with procedural justice at the global level while also alleviating the problem of structural injustice insofar as it exacerbates procedural injustice Acknowledging the fact that the discussion of global justice is difficult in a world constituted of lots of sovereign states it sketches out a political theory which begins with the problem of morals and then consecutively moves on to the matter of justice The result is a novel normative theory narrowing the gap between Neo Westphalian and Post Westphalian traditions
