## **The Politics Of The Environment:**

**The Politics of the Environment** Neil Carter, 2007-04-19 The continuous rise in the profile of the environment in politics reflects growing concern that we may be facing a large scale ecological crisis The new edition of this highly acclaimed textbook surveys the politics of the environment providing a comprehensive and comparative introduction to its three components ideas activism and policy Part I explores environmental philosophy and green political thought Part II considers parties and environmental movements and Part III analyses policy making and environmental issues at international national and local levels This second edition has been thoroughly updated with new and revised discussions of many topics including the ecological state ecological citizenship ecological modernisation and the Greens in government and also includes an additional chapter on Globalisation Trade and the Environment As well as considering a wide variety of examples from around the world this textbook features a glossary guides to further study chapter summaries and critical questions throughout *The Politics of the Environment* Chukwumerije Okereke, 2007 The environment is increasingly seen at the forefront of many political agendas Covering important topics such as the Kyoto protocol and deforestation this book provides extensive coverage of all aspects of environmental politics Essays of around 6 000 words in length make up the bulk of the book Written by notable experts in the field of environmental politics these essays each examine a different aspect of the subject **The Politics of the Environment** Neil Carter, 2001-11-29 The rising profile of the environment in politics reflects growing public concern that we may be facing a large scale ecological crisis This unique textbook surveys the politics of the environment providing a comprehensive and comparative introduction to ideas activism and policy Part One explores environmental philosophy and green political thought assessing the relationship between green ideas and other political doctrines Part Two considers parties and movements including the development of green parties from protest parties the response of established political parties to the environmental challenge and the evolution of the environmental movement Part Three analyses public policy making and environmental issues at the international national and local levels As well as considering a wide variety of examples from around the world this important new textbook includes glossary lists of key issues chapter summaries and guides to further study **The Global Environment and World Politics** Elizabeth R. DeSombre, 2002 Politically the world is composed of states Environmentally the world is made up of ecosystems This disconnection between ecological and political systems makes addressing environmental issues at the global level both more difficult and more necessary In this entry level textbook Elizabeth DeSombre examines how we should set about addressing the problems that face the environment internationally The field of international environmental politics draws on a variety of academic traditions It uses international relations theory to look at the concerns and actions of states but it also uses a variety of new perspectives to explain issues that are unique to the study of the environment DeSombre explores four important approaches to the field international environmental cooperation the relationship between the environment and

security the issues of science uncertainty and risk and the role of non state actors She examines these approaches through case studies of specific problems facing the global environment looking at ozone depletion and global climate change the politics of whaling the protection of Amazonian biodiversity and acid rain in Europe and North America To a large extent all environmental politics are global The author argues that understanding what has led to successful protection of the global environment can give great insight into international relations theory more broadly *The Politics of Environment, a Profile* Vandana Asthana,1992 *Environment and Politics* Timothy Doyle,Doug McEachern,Sherilyn MacGregor,2015-08-27 *Environment and Politics* 4th Edition is a concise introduction to this ever expanding interdisciplinary field explaining and illustrating how concepts conflicts movements political systems and the practices of policy making can be analysed in a systematic way This book provides a comprehensive overview of the key themes that shape the field and examines a diverse range of environmental problems and policy solutions found in different countries and cultures The new edition has been extensively revised to include up to date explanation of green political theories and traditions and the debates that shape action on the ground It contains an expanded discussion of environmental movements that work in the Global North the Global South and transnationally Greater attention has been given to the roles of corporations non governmental organizations the media consumers and citizens in order to reflect the changing nature of environmental governance The text also focuses throughout on debates surrounding the concepts of environmental security environmental justice and environmental citizenship The authors examine the institutional responses of parliaments administrative legal and electoral systems the more informal politics of social movements and the politics of markets and the corporate sector as they respond to or resist the greening of societies This engaging text has been fully updated to offer readers a greater understanding of international national and local environmental politics as well as expected future developments at all levels *Environment and Politics* continues to use illustrative examples of conflicts people and events spanning North and South America Europe Asia Africa and Australia giving it global perspective and relevance Each chapter includes questions for debate as well as a list of key words and resources for independent research This successful textbook remains a key resource for undergraduate and postgraduate studies across politics environmental studies development studies and human geography courses

**Environmental Politics** Robert Garner,1996 Recently the environment has shot to the top of the political agenda This book provides an accessible introduction to this often complex area by identifying and exploring the dimensions of environmental politics **The Politics of Environment, a Profile** Vandana Asthana,1992 *The Politics of the Earth* John S. Dryzek,2013 John Dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues He analyses the main discourses from the last 30 years and those likely to be influential in future *The Politics of Environment in Southeast Asia* Philip Hirsch,Carol Warren,2002-01-31 *The Politics of Environment in Southeast Asia* charts the emergence of the environment as an issue of public debate in the region Through a

series of case studies the authors explore the coalescence of social forces around environmental issues the process of alliance formation and the role of state institutions media and NGOs in the complex political battles over resource allocation The volatile tensions between the winners and losers in this struggle for the environment will make Southeast Asia a focus of increased attention

**The Politics of Climate Change** Anthony Giddens, 2013-04-23 A landmark study in the struggle to contain climate change the greatest challenge of our era I urge everyone to read it Bill Clinton 42nd President of the United States of America Since it first appeared this book has achieved a classic status Reprinted many times since its publication it remains the only work that looks in detail at the political issues posed by global warming This new edition has been thoroughly updated and provides a state of the art discussion of the most formidable challenge humanity faces this century If climate change goes unchecked the consequences are likely to be catastrophic for human life on earth Yet for most people and for many policy makers too it tends to be a back of the mind issue We recognize its importance and even its urgency but for the most part it is swamped by more immediate concerns Political action and intervention on local national and international levels are going to have a decisive effect on whether or not we can limit global warming as well as how we adapt to that already occurring However at the moment argues Giddens we do not have a systematic politics of climate change Politics as usual won't allow us to deal with the problems we face while the recipes of the main challenger to orthodox politics the green movement are flawed at source Giddens introduces a range of new concepts and proposals to fill in the gap and examines in depth the connections between climate change and energy security

The Politics of Environmental Discourse Maarten A. Hajer, 1995-12-14 Dr Hajer's path breaking study opens the way for a better understanding of the environmental conflict showing how language can be seen to shape our view of what environmental politics is really about and how those perceptions can differ between countries The author identifies the emergence and increasing political importance of ecological modernization as a new concept in the language of environmental politics This concept which has come to replace the antagonistic debates of the 1970s stresses the opportunities of environmental policy for modernizing the economy and stimulating the technological innovation Combining abstract social theory with detailed empirical analysis Martin Hajer illustrates the social and political dynamics of ecological modernization in a detailed analysis of the acid rain controversies in Great Britain and the Netherlands He concludes by reflecting on the institutional challenge of the environmental politics in the years to come

Critical Political Ecology Tim Forsyth, 2003 Describes new ways of looking at environmental science and politics and discusses the problems of formulating and implementing environmental policy particularly in the global arena and in developing countries

**American Politics And the Environment** Glen Sussman, Byron W Daynes, PH.D., Jonathan P West, 2001-09-01 Sussman Glenn Daynes Byron W West Jonathan P American Politics and the Environment In order to effect change in environmental policy it is necessary to understand the politics of environmental decision making and how political actors operate within political institutions American Politics and the

Environment offers a unique behavioral and institutional approach this new book provides readers with a consistent theoretical framework they can use from chapter to chapter to help them better grasp the material Three boxed features in each chapter one highlighting a person one presenting a case study and another investigating the issue of air pollution offer real world examples and illustrations and provide the opportunity for analysis For those interested in environmental politics and environmental policy making *Environmental Politics in the Middle East* Harry Verhoeven, 2018 This book investigates how ecology and politics meet in the Middle East and how those interactions connect to the global political economy Through region wide analyses and case studies from the Arabian Peninsula the Gulf of Aden the Levant and North Africa the volume highlights the intimate connections of environmental activism energy infrastructure and illicit commodity trading with the political economies of Central Asia the Horn of Africa and the Indian subcontinent The book's nine chapters analyse how the exploitation and representation of the environment have shaped the history of the region and determined its place in global politics It argues that how the ecological is understood instrumentalised and intervened upon is the product of political struggle deconstructing ideas and practices of environmental change means unravelling claims of authority and legitimacy This is particularly important in a region frequently seen through the prism of environmental determinism where ruling elites have imposed authoritarian control as the corollary of environmental crisis This unique and urgent collection will question much of what we think we know about this pressing issue

#### **The Politics of the Climate Change-Health Nexus**

Maximilian Jungmann, 2021-05-09 This book compares how governments in 192 countries perceive climate change related health risks and which measures they undertake to protect their populations Building on case studies from the United Kingdom Ireland South Korea Japan and Sri Lanka *The Politics of the Climate Change Health Nexus* demonstrates the strong influence of epistemic communities and international organisations on decision making in the field of climate change and health Jungmann shows that due to the complexity and uncertainty of climate change related health risks governments depend on the expertise of universities think tanks international organisations and researchers within the public sector to understand strategize and implement effective health adaptation measures Due to their general openness towards new ideas and academic freedom the book shows that more democratic states tend to demonstrate a higher recognition of the need to protect their populations However the level of success largely depends on the strength of their epistemic communities and the involvement of international organisations This volume will be of great interest to students and scholars of climate change and public health It will also be a valuable resource for policymakers from around the world to learn from best practices and thus improve the health adaptation work in their own countries

#### **Global Environmental Politics**

Jean-Frédéric Morin, Amandine Orsini, Sikina Jinnah, 2020 *Global Environmental Politics* provides a fully up to date and comprehensive introduction to the most important issues dominating this fast moving field Going beyond the issue of climate change the textbook also introduces students to the pressing issues of desertification trade in hazardous waste biodiversity

protection whaling acid rain ozone depletion water consumption and over fishing Importantly the authors pay particular attention to the interactions between environmental politics and other governance issues such as gender trade development health agriculture and security

The Politics of Climate Change Paul G. Harris, 2013-09-13 Climate change is now a mainstream part of the international political agenda It has become clear that it is not solely a technical issue to be resolved by scientists but a political issue with political implications at all levels of global governance Indeed some may argue that few long term problems in international affairs are more important than this one The purpose of this book is to reveal and apply some of the latest thinking on the implications of climate change for international affairs and to explore how various proposals for tackling climate change will affect interstate relations in coming years Chapters by scholars of international relations international political economy and international law contribute to current discussions of climate change doing so in way that is accessible to students stakeholders government officials and informed laypersons Some questions considered in the book include the following How has the discussion of climate change affected interstate relations How does this problem and how do environmental issues more generally challenge international relations theory How do international climate politics influence domestic politics and vice versa How would climate change or action taken to tackle it affect the balance of power or balance of influence Is climate change a matter of international security or international justice or both and how does the answer to this question affect policy responses of governments Which states are likely to benefit or suffer from the various proposals to address climate change What are the legal ethical and political implications of the uneven distribution of the impacts of climate change This book was previously published as a special issue of the Cambridge Review of International Affairs

**American Politics and the Environment** Byron W. Daynes, Glen Sussman, Jonathan Page West, 2016 Examines the role of politics in the environmental policy making process
