*An Introduction to Modern Business Statistics* George C. Canavos, Don M. Miller, 1999 Using the computer to eliminate rote computation and facilitate learning this book inspires and motivates readers to learn statistics by showing them its great practical importance to their careers In every chapter the authors include an ample number of examples and vignettes that illustrate and emphasize skills that enable students to interpret data effectively and to convert data into usable information This approach enhances students abilities to make better decisions thus preparing them to exert greater influence in their future careers To reinforce the idea that statistics is the linkage that transforms data into useful information thereby enhancing planning and decision making almost every numbered example includes introductory language that articulates the importance of the illustration in

a functional area of business The authors use Microsoft Excel MINITAB and JMP IN statistical software to execute statistical methods presenting computer outputs and interpretation first then illustrating the method using statistical tables In addition to promote the learning of fundamentals the authors also take the users through many methods step by step using examples with very small data sets Chapter appendices provide clear detailed instructions on the use of Excel MINITAB and JMP IN Users are not just purchasing a textbook every new copy of the book is packaged with a student software and data disk This disk contains Data Analysis Plus Add ins for Microsoft Excel as well as all the data sets used in the book formatted for Excel MINITAB JMP IN and ASCII In addition to the many examples and exercises they included in the First Edition the authors add approximately 120 exercises based on published articles in academic journals the popular media or widely available sources of data Many of these exercises contain large data sets and many are revisited in subsequent chapters

**Learning Business Statistics with Microsoft Excel 2000** John L. Neufeld, 2001 Business statistics students at both the undergraduate and MBA level who are not experts in the use of Excel This text is designed to reflect the important changes in the teaching of statistics brought about by the usage of computers It takes advantage of the ability of

computers to help students understand statistical methods It uses a straightforward step by step approach and uses the computer both as a tool for solving statistical problems and as pedagogical device to help students understand difficult concepts Excel usage has been simplified Less emphasis on formatting More emphasis on helping students get the big picture Excel is used more as a scratch pad In the revision the approach has moved from creating worksheets which automatically solve problems to using Excel as a scratch pad for each problem that arises All screen captures updated to Excel 2000 and all the material has been tested on Excel 2000 Step by step instructions Detailed instructions are given as each new topic is introduced As students become more familiar with the topics less coaching is provided Computer demonstrations reinforce student understanding Students are directed to use Exce
