

The background of the book cover is a dense, dark green forest scene. In the foreground, the intricate, silhouetted branches of a large tree are visible against a lighter green background. The overall texture is grainy and has a painterly, historical feel.

The Amazon Rubber Boom 1850 1920:

The Amazon Rubber Boom, 1850-1920 Barbara Weinstein, 1983-06-01 The first complete account of the rise and fall of the rubber economy in Brazil provides a dramatic example of one of the boom and bust cycles traditionally associated with Brazilian economic history. The Amazon rubber trade was one of the most important export booms in the history of Latin America, dominating the economic life of the Amazon for 70 years until the successful cultivation of rubber trees by the British in Southeast Asia. Yet this long period of vigorous economic activity left the basic structure of Amazonian society relatively unchanged. One of the author's main concerns is to explore why rubber exports did not generate substantial growth in either the industrial or the agricultural sector and she finds the answers primarily in the relations of production and exchange that characterized the Amazon's extractive economy. The study also considers the impact of political decentralization and regionalism on the Amazonian economy, draws comparisons with the coffee boom in São Paulo that induced sustained industrial growth in that area and traces the consequences of the rubber economy's collapse on the social, political and economic life in the Amazon. **Prosperity Without Development** Barbara Sue Weinstein, 1982

Understories: Plants and Culture in the American Tropics Lesley Wylie, 2023-11-15 *Understories: Plants and Culture in the American Tropics* establishes the central importance of plants to the histories and cultures of the extended tropical region stretching from the US South to Argentina. Through close examination of a number of significant plants—cacao, mate, agave, the *hevea brasiliensis*, kudzu, the breadfruit, soy, and the *ceiba pentandra*, among others—this volume shows that vegetal life has played a fundamental role in shaping societies and in formulating cultural and environmental imaginaries in and beyond the region. Drawing on a wide range of cultural traditions and forms across literature, popular music, art, and film, the essays included in this volume transcend regional and linguistic boundaries to bring together multiple plant centred histories or *understories* narratives that until now have been marginalized or gone unnoticed. Attending not only to the significant influence of humans on plants but also of plants on humans, this book offers new understandings of how colonization, globalization, and power were and continue to be imbricated with nature in the American tropics. **The Color Line and the Assembly Line** Elizabeth Esch, 2018-05-04 *The Color Line and the Assembly Line* tells a new story of the impact of mass production on society. Global corporations based originally in the United States have played a part in making gender and race everywhere. Focusing on Ford Motor Company's rise to become the largest, richest, and most influential corporation in the world, *The Color Line and the Assembly Line* takes on the traditional story of Fordism. Contrary to popular thought, the assembly line was perfectly compatible with all manner of racial practice in the United States, Brazil, and South Africa. Each country's distinct racial hierarchies in the 1920s and 1930s informed Ford's often divisive labor processes. Confirming racism as an essential component in the creation of global capitalism, Elizabeth Esch also adds an important new lesson showing how local patterns gave capitalism its distinctive features. **Toward a New Culture of the Material** Frank Bauer, Yoonha

Kim, Sabine Marienberg, Wolfgang Schäffner, 2024-09-03 What happens when we begin treating multi stable ambivalent and adaptive behaviors of active matter as a formative principle The contributions of this volume investigate the potential of the processual and untamable ranging from microbial co designing morphogenetic experimentation and atmospheric creation to plasticity and liveliness in architecture history of art and scientific concepts Walking the line between analog and digital forms the 19 perspectives from the Cluster of Excellence Matters of Activity not only cross disciplinary and methodological boundaries but also aim at installing a new material paradigm between the epistemic cultures of sciences humanities and design Investigating a new culture of the material Interdisciplinary views on active structures adaptive materials and sustainability

The New Brazilian Economy Elias C. Grivoyannis, 2016-12-12 This edited collection provides a thorough historical statistical and institutional description of the current Brazilian economy and the previous economic structure from which it is emerging The contributions explore the institutional economic and cultural forces shaping the current development of the Brazilian economy and discuss how they will influence future progress Together the chapters form a picture of the international implications of Brazil's emergence as a major world economic power Topics covered include the growth and shrinkage of industry the consumption boom and the financial crisis sustainable financial growth and public debt management the evolution of antitrust policy and the privatization of state owned firms and more Academics and researchers of BRICS countries and Latin American and Caribbean studies will find these contributions a valuable addition to their research
