"These observations from RGA-2 show much of the same in the case of the *Yersinia enterocolitica* strain Phage-103, RGA-2, RGA-3, and RGA-4. The results of these investigations are summarized under the heading Phage-103. The results of the RGA-2 and RGA-3 strains are similar. These two organisms however may be distinguished further from each other by their different growth requirements, particularly in the presence of bile salts. The combination of bile salts and the RGA-2 and RGA-3 organisms may produce the same results as the RGA-4 organism.
