## CHAPTER 1

### WHAT THEOSOPHY IS

(Page 1) ♦ There is a school of philosophy still in existence of which modern culture has lost sight.♦ In these words Mr. A. P. Sinnett began his 1881 book, [The Occult World](#), the first popular exposition of Theosophy, published thirty years ago. During the years that have passed since then, many thousands have learned wisdom in that school, yet to the majority its teachings are still unknown, and they can give only the vaguest of replies to the query, ♦What is Theosophy?♦

Two books already exist which answer that question: Mr. Sinnett♦s [Esoteric Buddhism](#) and Mrs. Besant♦s [The Ancient Wisdom](#). I have no thought of entering into competition with those standard works; what I desire is to present a statement, as clear and simple as I can make it, which may be regarded as introductory to them.

We often speak of Theosophy as not in itself a religion, but the truth which lies behind all religions alike. That is so; yet, from another point of view, we may surely say that it is at once a philosophy, because it puts plainly before us an explanation of the scheme (Page 2) of evolution of both the souls and the bodies

[Textbook of Theosophy](#) Charles Webster Leadbeater, Wynn Wagner, 2012-05-20 Theosophy is a technique from the 1600s that showed quite a bit of interest in esoteric circles of the twentieth century. The theosophist seeks to understand the mysteries of the universe and the bonds that unite the universe, humanity, and the divine. The goal of theosophy is to explore the origin of divinity and humanity and the end of world life and humanity. From investigation of those topics, theosophists try to discover a coherent description of the purpose and origin of the universe. We often speak of Theosophy as not in itself a religion but the truth which lies behind all religions alike. As a philosophy, it explains to us that the solar system is a carefully ordered mechanism, a manifestation of a magnificent life of which man is but a small part. Nevertheless, it takes up that small part which immediately concerns us and treats it exhaustively under three heads: present, past, and future.

[Textbook of Theosophy \(Classic Reprint\)](#) C. W. Leadbeater,2017-11-19 Excerpt from A Textbook of Theosophy Of those that are yet to come there is also much to be said and on this subject too a great deal of definite information is available Such information is obtainable first from men who have already passed much further along the road of evolution than we and have consequently direct experience of it and secondly from inferences drawn from the ob vicus direction of the steps which we see to have been previously taken The goal of this particular cycle is in sight though still far above us but it would seem that even when that has been attained an infinity of progress still lies before everyone who is willing to undertake it One of the most striking advantages of Theosophy is that the light which it brings to us at once solves many of our problems clears away many difficulties accounts for the apparent injustices of life and in all directions brings order out of seeming chaos Thus while some of its teaching is based upon the observation of forces whose direct working is some what beyond the ken of the ordinary man of the world if the latter will accept it as a hypothesis he will very soon come to see that it must be a correct one because it and it alone furnishes a coherent and reasonable explanation of the drama of life which is being played before him About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

puts plainly before us an explanation of the scheme of evolution of both the souls and the bodies contained in our solar system It is a religion in so far as having shown us the course of ordinary evolution it also puts before us and advises a method of shortening that course so that by conscious effort we may progress more directly towards the goal It is a science because it treats both these subjects as matters not of theological belief but of direct knowledge obtainable by study and investigation It asserts that man has no need to trust to blind faith because he has within him latent powers which when aroused enable him to see and examine for himself and it proceeds to prove its case by showing how those powers may be awakened It is itself a result of the awakening of such powers by men for the teachings which it puts before us are founded upon direct observations made in the past and rendered possible only by such development
