Smallholder agriculture is the mainstay of Malawi s economy Its importance for livelihoods cannot be overstated 94 percent of rural residents and 38 percent of urban residents engage in agriculture to some extent Jones Shrinivas and Bezner Kerr 2014 the vast majority as smallholder farmers with landholdings of less than one hectare Smallholder crops are primarily maize which accounted for nearly 80 percent of smallholder cultivated land in 2011 followed by cassava and other food crops FAO 2008 IFAD 2011 These foods are grown for household consumption and for sale at local and regional markets As such the Malawian food supply especially in rural areas where markets are thin with few buying or selling options is shaped largely by trends in smallholder food crop production      **Agriculture in Malawi** Malawi. Malawi Agricultural Research Project,1979      **Malawi Agricultural Research Project** Malawi Agricultural Research Project,1984\*      *The Malawi Agricultural Input Subsidy Programme* Andrew Dorward,Ephraim W. Chirwa,2015 Malawi s implementation of a large scale agricultural input subsidy programme has attracted significant international interest This paper reviews the programme from 2005 06 to 2008 09 Nationwide disbursement of heavily subsidized fertilizers and seed to large numbers of beneficiaries represents a significant logistical achievement and substantially increased national maize production and productivity contributing to increased food availability higher real wages wider economic growth and poverty reduction However the latter years of the programme have been accompanied by high international fertilizer prices and costs and high maize prices the latter undermining the programme s food security poverty reduction and growth benefits for many poor Malawian farmers relying on purchased maize for substantial amounts of their staple food requirements Estimated economic returns to the programme have been satisfactory given other programme benefits not captured in cost benefit analysis With substantial reductions in both prices and subsidized volumes of fertilizers in subsequent years there is considerable scope for building on achievements to raise

programme effectiveness efficiency and benefits Any application of Malawi s subsidy experience to other countries should take into account the special characteristics of the Malawian maize economy and measures needed to raise programmes effectiveness and efficiency and their contribution to sustainable development policies
