Small Worlds Sixty Moons Of Our Solar System:

Reading Programs for Young Adults Martha Seif Simpson, 2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs Small Worlds Joseph W. Kelch, 1990 Discusses the origin and characteristics of each of the moons circling the planets of the solar system and presents information on both manned and unmanned space exploration **Theme Immersion** Maryann Murphy Manning, Gary L. Manning, Roberta Long, 1994 The authors of this book define theme immersion as an in depth study of a topic an issue or a question Theme immersion is very different from the traditional unit or theme approach The authors clearly point out these differences with respect to how a topic is selected what is studied and the roles of the teacher and the students By inviting the reader into the classrooms of theme immersion teachers the authors show dramatically that the teacher does not impose or control ideas but is an active member of a community of learners Personable and practical Theme Immersion will be invaluable for classroom teachers who want to teach with such excitement and relevance that their students become lifelong learners Teachers wanting to implement a theme study approach in their classrooms will find all the direction they need in Theme Immersion Laurie's Technical series of reading books James Stuart Laurie, 1870 *The Moon* David Whitehouse, 2016-04-07 In *The Moon* David Whitehouse explains how our nearest celestial neighbor was created and what moonrocks tell us of its earth shattering origins and how its existence may have been a crucial factor in mankind being here at all Whitehouse discusses how man has related to it worshipped it and blamed it for his own lunacy though can it really affect our behavior He tells how the first person to look at the moon through a telescope was not Galileo as is commonly believed but an Englishman who knew Shakespeare and had a part in the Gunpowder Plot While some of the story of the modern moon race may be known the first moon race to map its surface has not been charted before and is one of the most dramatic and unexpected stories in science The recent discovery of ice hidden in the moon's polar regions opens up new possibilities for space travel that mean it is essential that mankind returns there if we are ever to journey to the rest of the solar system **Simply Astronomy** DK, 2021-11-18 The simplest guide to astronomy and stargazing Grasping astronomy has never been easier The awe of the night sky will soon turn into knowledge of the constellations planets and

astrological phenomena Bold graphics and easy to understand text make this visual guide the perfect introduction to astronomy and stargazing for those who have little time but a big thirst for knowledge Inside you ll find Simple easy to understand graphics that help to explain astronomy space and the night sky in a clear visual way The latest astronomical information on black holes gravitational waves the origin of the Universe and the planets of the Solar System User friendly star charts that guide you through the sky using brighter stars as signposts to locate harder to see objects Essential advice on the practicalities of stargazing from observing with the naked eye to using telescopes Each pared back entry covers the essentials more clearly than ever before The opening chapters provide an introduction to the Universe a visual tour of the Solar System and a guide to more distant objects such as stars and galaxies Along the way concepts such as the Big Bang gravity and space time are introduced and explained Later chapters describe how to navigate around the night sky and introduce some must see constellations complete with simple star charts Whether you are a complete beginner or simply want a jargon free reference to astronomy and stargazing this essential guide is packed with everything you need to understand the basics quickly and easily

Standard ed* George W. Ogilvie,1891 Astronomy Eric Chaisson,Steve McMillan,1998 Designed for readers with little or no scientific background this brief paperback introduction to astronomy features an exceptionally clear writing style an emphasis on critical thinking and visualization and a leading edge technology program including an accompanying full featured electronic multimedia version of the book and companion Web site A dynamic art program includes numerous radio infrared ultraviolet X ray and gamma ray images and transparent full color overlays The copernican revolution light and matter the inner workings of the cosmos telescopes the tools of astronomy the solar system interplanetary matter and the birth of the planets earth and its moon the terrestrial planets the Jovian planets moon rings and pluto the sun measuring the stars the interstellar medium stellar evolution neutron stars and black holes the Milky Way galaxy normal galaxies active galaxies and quasars cosmology the Big Bang and the fate of the universe life in the universe are we alone **PASCAL.** ,1991 *New Space Frontiers* Piers Bizony,2014-10-15 Take a journey into the New Space Frontier It is easy to imagine that the space shuttle s retirement has edged the Space Age toward closure at least in terms of human flight beyond the

bounds of earth In fact there are more people carrying ships being constructed now than at any time since Yuri Gagarin became the first man in space half a century ago Some are already servicing the International Space Station which incidentally has ensured a permanent human presence in space for the last two decades and is set to continue and expand for decades yet to come What's more NASA is no longer the only big player in the space game Commercial non governmental space exploration is becoming a reality rather than just a pipe dream What orbital adventures await us in the next five decades Will humans ever again head into deep space as the Apollo astronauts once did NASA's new hardware is aimed toward asteroid missions and ultimately Mars but there is a significant chance that a government funded space agency will not be the only or even the first organization to send humans across the solar system Get ready to experience the excitement of adventure with New Space Frontier Through gorgeous photography and engaging writing noted space and science author Piers Bizony speculates beyond just today's hardware and explores what might be possible for the next generation
