Skills Of Interviewing:

Basic Interviewing Skills Raymond L. Gorden, 1998-05-22 Interviewing skills are not simple motor skills. Rather they involve a high order combination of observation, empathic sensitivity and intellectual judgment. This guidebook, now available from Waveland Press, provides a process model and a corresponding set of classroom tested exercises designed to improve basic interviewing skills. The model, called the Skill Learning Cycle, provides an initial guided experience for the complete interview learning process including planning, doing and analyzing phases. It also stands as a model for the student to use in the future for continued growth in interviewing skills. In order to focus on the most basic interviewing skills, only the information gathering function which is common to all interviews is discussed.

The book introduces the key techniques of interviewing and shows how these techniques can be put to effective use in specific types of interviews.
