   Foundations for Efficient Web Service Selection Qi Yu,Athman Bouguettaya,2009-09-02 Foundations for Efficient Web Service Selection describes the foundational framework for efficient Web service selection It lays out a theoretical underpinning for the design of models and algorithms for searching and optimizing access to Web services Excerpts from Prof Fabio Casati s foreword This excellent book looks at the search problem from a broader perspective Instead of narrowing down on a specific aspect or subproblem of service search it dissects and analyzes the fundamental problems in search and presents concrete applicable solutions as well as the theoretical foundations behind them One aspect I found particularly significant in the book is the mind shift it generates from thinking about service modeling for the sake of supporting deployment or invocation to modeling for supporting search This design for search approach is exactly what we do when we design databases because search is what we worry about in that case and there is no reason why this shouldn t be the case for services if we want services to be searchable with a similar effectiveness *Data Science* Qinglei Zhou,Yong Gan,Weipeng Jing,Xianhua Song,Yan Wang,Zeguang Lu,2018-09-10 This two volume set CCIS 901 and 902 constitutes the refereed proceedings of the 4th International Conference of Pioneering Computer Scientists Engineers and Educators ICPCSEE 2018 originally ICYCSEE held in Zhengzhou China in September 2018 The 125 revised full papers presented in these two volumes were carefully reviewed and selected from 1057 submissions The papers cover a wide range of topics related to basic theory and techniques for data science including mathematical issues in data science computational theory for data science big data management and applications data quality and data preparation evaluation and measurement in data science data visualization big data mining and knowledge management infrastructure for data science machine learning for data science data security and privacy applications of data science case study of data science multimedia data management and analysis data driven scientific research data driven bioinformatics data driven healthcare data driven management data driven eGovernment data driven smart city planet data marketing and economics social media and recommendation systems data driven security data driven business model innovation social and or organizational impacts of data science **Data Mining and Big Data** Ying Tan,Hideyuki Takagi,Yuhui Shi,2017-07-18 This book constitutes the refereed proceedings of the Second International Conference on Data Mining and Big Data DMBD 2017 held in Fukuoka Japan in July August 2017 The 53 papers presented in this volume were carefully reviewed and selected from 96 submissions They were organized in topical sections named association analysis clustering prediction classification schedule and sequence analysis big data data analysis data mining text mining deep learning high performance computing knowledge base and its framework and fuzzy control **Database Systems for Advanced Applications** Hong Gao,Jinho Kim,Yasushi Sakurai,2016-04-11 This book constitutes the workshop proceedings of the 21st International Conference on Database Systems for Advanced Applications DASFAA 2016 held in Dallas TX USA in April 2016 The volume contains 32 full papers
