Slide Mountain Or The Folly Of Owning Nature

Jo Steffens

Slide Mountain Or The Folly Of Owning Nature:

Slide Mountain Theodore Steinberg, 1996-11-07 The drive to own the natural world in twentieth century America seems virtually limitless Signs of this national penchant for possessing nature are everywhere from suburban picket fences to elaborate schemes to own underground water clouds even the ocean floor Yet as Theodore Steinberg demonstrates in this compelling witty look at Americans attempts to master the environment nature continually turns these efforts into folly In a rich narrative style recalling the work of John McPhee Steinberg tours America to explore some of the more unusual dilemmas that have arisen in our struggle to possess nature Beginning along the Missouri River Steinberg recounts the battle for three thousand acres of land the river carved from a Nebraska Indian reservation and deposited in Iowa Then he travels to Louisiana where an army of lawyers butted heads over whether Six Mile Lake was actually a lake or a stream He continues to Arizona to investigate who owned the underground then to Pennsylvania's Blue Ridge Mountains to see who claimed the clouds He ends in crowded New York City with Donald Trump's struggle for air rights Americans obsession with owning nature was immortalized by Mark Twain in the tale of Slide Mountain where a landslide prone Nevada peak turned the American dream of real estate into dust In relating these modern day Slide Mountain stories Steinberg illuminates what it means to live in a culture of property where everything must have an owner Slide mountain , *The Farm as Natural Habitat* Dana L. Jackson, Laura Jackson, 2002-04 The Farm as Natural Habitat is a vital new contribution to the debate about agriculture and its impacts on the land Arising from the conviction that the agricultural landscape as a whole could be restored to a healthy diversity the book challenges the notion that the dominant agricultural landscape bereft of its original vegetation and wildlife and despoiled by chemical runoff is inevitable if we are to feed ourselves Contributors bring together insights and practices from the fields of conservation biology sustainable agriculture and environmental restoration to link agriculture and biodiversity farming and nature in celebrating a unique alternative to conventional agriculture Rejecting the idea that ecological sacrifice zones are a necessary part of feeding a hungry world the book offers compelling examples of an alternative agriculture that can produce not only healthful food but fully functioning ecosystems and abundant populations of native species Contributors include Collin Bode George Boody Brian DeVore Arthur Tex Hawkins Buddy Huffaker Rhonda Janke Richard Jefferson Nick Jordan Cheryl Miller Heather Robertson Carol Shennan Judith Soule Beth Waterhouse and others The Farm as Natural Habitat is both hopeful and visionary grounded in real examples and guided by a commitment to healthy land and thriving communities It is the first book to offer a viable approach to addressing the challenges of protecting and restoring biodiversity on private agricultural land and is essential reading for anyone concerned with issues of land or biodiversity conservation farming and agriculture ecological restoration or the health of rural communities and landscapes **Loving Nature, Fearing the State** Brian Allen Drake, 2013-11-01 A conservative environmental tradition in America may sound like a contradiction in terms but as Brian Allen Drake shows in *Loving Nature Fearing the State* right

leaning politicians and activists have shaped American environmental consciousness since the environmental movement's beginnings. In this wide-ranging history, Drake explores the tensions inherent in balancing an ideology dedicated to limiting the power of government with a commitment to protecting treasured landscapes and ecological health. Drake argues that antistatist beliefs, an individualist ethos, and a mistrust of government have colored the American passion for wilderness but also complicated environmental protection efforts. While most of the successes of the environmental movement have been enacted through the federal government, conservative and libertarian critiques of big government environmentalism have increasingly resisted the idea that strengthening state power is the only way to protect the environment. *Loving Nature, Fearing the State* traces the influence of conservative environmental thought through the stories of important actors in postwar environmental movements. The book follows small government pioneer Barry Goldwater as he tries to establish federally protected wilderness lands in the Arizona desert and shows how Goldwater's intellectual and ideological struggles with this effort provide a framework for understanding the dilemmas of an antistatist environmentalism. It links antigovernment activism with environmental public health concerns by analyzing opposition to government fluoridation campaigns and investigates environmentalism from a libertarian economic perspective through the work of free market environmentalists. Drake also sees in the work of Edward Abbey an argument that reverence for nature can form the basis for resistance to state power. Each chapter highlights debates and tensions that are important to understanding environmental history and the challenges that face environmental protection efforts today.

Research Handbook on Legal Semiotics

Anne Wagner, Sarah Marusek, 2023-11-03 This comprehensive Research Handbook explores the wide variety of work conducted in legal semiotics to provide a broad understanding of how the law works through signs and symbols. Demonstrating that law is a strategic system of fluctuating signs, contributors critically analyse the ever-evolving conceptualisations of law and legal discourse.

Environmental Law and Contrasting Ideas of Nature

Keith H. Hirokawa, 2014-07-17 Law's ideas of nature appear in different doctrinal and institutional settings, historical periods, and political dialogues. Nature underlies every behavior, contract, or form of wealth, and in this broad sense influences every instance of market transaction or governmental intervention. Recognizing that law has embedded discrete constructions of nature helps in understanding how humans value their relationship with nature. This book offers a scholarly examination of the manner in which nature is constructed through law, both in the hard sense of directly regulating human activities that impact nature and in the soft manner in which law's ideas of nature influence and are influenced by behaviors, values, and priorities. Traditional accounts of the intersection between law and nature generally focus on environmental laws that protect wilderness. This book will build on the constructivist observation that when considered as a culturally contingent concept, nature is a self-perpetuating and self-reinforcing social creation.
