Cities and Wetlands Rod Giblett, 2016-08-11 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com From New Orleans to New York from London to Paris to Venice many of the world's great cities were built on wetlands and swamps *Cities and Wetlands* is the first book to explore the literary and cultural histories of these cities and their relationships to their environments and buried histories Developing a ground breaking new mode of psychoanalytic ecology and surveying a wide range of major cities in North America and Europe ecocritic and activist Rod Giblett shows how the wetland origins of these cities haunt their later literature and culture and might prompt us to reconsider the relationship between human culture and the environment Cities covered include Berlin Boston Chicago Hamburg London New Orleans New York Paris St Petersburg Toronto Venice and Washington

Landscapes of Culture and Nature R. Giblett, 2009-09-29 A bold and exciting exploration of the relationship and interactions between humans the human landscape and the earth looking at a diverse range of case studies from the nineteenth century city to the Asian tsunami and Hurricane Katrina

Environmental Humanities and the Uncanny Rod Giblett, 2019-04-12 Sigmund Freud's essay *The Uncanny* is celebrating a century since publication It is arguably his greatest and most fruitful contribution to the study of culture and the environment *Environmental Humanities and the Uncanny* brings into the open neglected aspects of the uncanny in this famous essay in its centenary year and in the work of those before and after him such as Friedrich Schelling Walter Benjamin E T A Hoffmann and Bram Stoker This book does so by focussing on religion especially at a time and for a world in which some sectors of the monotheisms are in aggressive and sometimes violent contention against those of other monotheisms and even against other sectors within their own monotheism The chapter on Schelling's uncanny

argues that monotheisms come out of polytheism and makes the plea for polytheism central to the whole book It enables rethinking the relationships between mythology and monotheistic and polytheistic religions in a culturally and politically liberatory and progressive way Succeeding chapters consider the uncanny cyborg the uncanny and the fictional and the uncanny and the Commonwealth concluding with a chapter on Taoism as a polytheistic religion Building on the author's previous work in Environmental Humanities and Theologies in bringing together theories of religion and the environment this book will be of great interest to students and scholars of the environmental humanities ecocultural studies and religion
