The Intuition Of The Will:

The Reason We Are Here - The Truth Mary E McGovern,2004 Readers will discover the roles the soul and the ego play in their lives as well as the universal message of the Truth as it relates to their lives The Intuition of the Will Ernest Wood,1926 *Intuition: The Inside Story* Robbie Davis-Floyd,P. Sven Arvidson,2016-02-04 Science could never have proceeded without the creativity of intuition yet intuition is poorly understood and poorly studied In Intuition The Inside Story scholars explore the nature of intuition and its practical place in the social and behavioral sciences and the arts These contributors present the latest theoretical developments and research and provide every day examples of intuition from the lab and field They discuss the nature and experience of intuition from the perspectives of anthropology philosophy physics engineering psychology medicine and midwifery Contributors include Marcie Boucouvalas Guy Burneko Brenda J Dunne Jeremy Hayward Charles Laughlin Evelyn Monsay Anne Pineault Luci Roncalli and Joe Sheridan The Intuition of the Will Ernest Wood,2013-10 This is a new release of the original 1927 edition **Mathematical Intuition** R.L.

Tieszen,2012-12-06 Intuition has perhaps been the least understood and the most abused term in philosophy It is often the term used when one has no plausible explanation for the source of a given belief or opinion According to some sceptics it is understood only in terms of what it is not and it is not any of the better understood means for acquiring knowledge In mathematics the term has also unfortunately been used in this way Thus intuition is sometimes portrayed as if it were the Third Eye something only mathematical mystics like Ramanujan possess In mathematics the notion has also been used in a host of other senses by intuitive one might mean informal or non rigorous or visual or holistic or incomplete or perhaps even convincing in spite of lack of proof My aim in this book is to sweep all of this aside to argue that there is a perfectly coherent philosophically respectable notion of mathematical intuition according to which intuition is a condition necessary for mathematical knowledge I shall argue that mathematical intuition is not any special or mysterious kind of faculty and that it is possible to make progress in the philosophical analysis of this notion This kind of undertaking has a precedent in the philosophy of Kant While I shall be mostly developing ideas about intuition due to Edmund Husser there will be a kind of Kantian argument underlying the entire book Epistemic Thought Experiments and Intuitions Manhal Hamdo,2023-06-28

This work investigates intuitions nature demonstrating how philosophers can best use them in epistemology First the author considers several paradigmatic thought experiments in epistemology that depict the appeal to intuition He then argues that the nature of thought experiment generated intuitions is not best explained by an a priori Platonism Second the book instead develops and argues for a thin conception of epistemic intuitions The account maintains that intuition is neither a priori nor a posteriori but multi dimensional It is an intentional but non propositional mental state that is also non conceptual and non phenomenal in nature Moreover this state is individuated by its progenitor namely the relevant thought experiment Third the author provides an argument for the evidential status of intuitions based on the correct account of the nature of epistemic

intuition The suggestion is the fitting ness approach intuition alone has no epistemic status Rather intuition has evidentiary value as long as it fits well with other pieces into a whole namely the pertinent thought experiment Finally the book addresses the key challenges raised by supporters of anti centrality according to which philosophers do not regard intuition as central evidence in philosophy To that end the author responds to them showing that they fail to affect the account of intuition developed in this book This text appeals to students and researchers working in epistemology
