The Ipcc Guide To Irish Peatlands

John Feehan

The Ipcc Guide To Irish Peatlands:

The IPCC Guide to Irish Peatlands Irish Peatland Conservation Council, 1987 **The Peatlands of Britain and Ireland** Clifton Bain, 2022-02-02 Clifton Bain now completes his trilogy with this look at the Peatlands of Britain and Ireland. A source of fuel for many generations they are now a haven for wildlife and plants as well as a storehouse of greenhouse gasses. Their social history is one of exploitation and the value of mending and restoring is a major theme of the book. Like its predecessors *The Peatlands of Britain and Ireland* will be a sumptuous volume richly illustrated with photographs and with drawings by the wildlife artist Darren Rees.

The Wetlands Handbook, 2 Volume Set Edward Maltby, Tom Barker, 2009-07-23. Forty-two chapters by international experts from a wide range of disciplines make *The Wetlands Handbook* the essential tool for those seeking comprehensive understanding of the subject. A departure from more traditional treatises, this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy. Introductory chapters address the scope and significance of wetlands globally for communities, culture, and biodiversity. Subsequent sections deal with processes underpinning wetland functioning, how wetlands work, their uses and values for humans and nature, their sensitivity to external impacts and how they may be restored. The text is illustrated by numerous examples emphasising functional and holistic approaches to wetland management, including case studies on the wise use and rehabilitation of wetlands in farmed, urban, industrial, and other damaged environments, highlighting the long-term benefits of multiple use. *The Wetlands Handbook* will provide an invaluable reference for researchers, managers, policy makers, and students of wetland sciences.

Nature in Ireland John Wilson Foster, Helena C. G. Chesney, 1998. How has Irish nature been studied? How has it been expressed in literature and popular culture? How has it influenced and been influenced by political, economic, and social change? These long-neglected questions are pursued in *Nature in Ireland*, a pioneering collection of original essays by leading naturalists, science writers, and cultural historians who bring us from the geological prehistory of Ireland to the environmental threats of the late twentieth century.

Irish Peatlands, the Critical Decade Peter J. Foss, 1991.

The Bogs of Ireland John Feehan, 1996.

The Irish Naturalists' Journal, 2002.

Reconstructing Quaternary Environments J. John Lowe, Michael Walker, 2014-10-28. This third edition of *Reconstructing Quaternary Environments* has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse, ranging from landforms and sediments to fossil assemblages and geochemical data, and includes new data from terrestrial, marine, and ice core records. Dating methods are described and evaluated, while the principles and practices of Quaternary stratigraphy are also discussed. The volume concludes with a new chapter which considers some of the key questions about the nature, causes, and consequences of global climatic and environmental change over a range of temporal scales. This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are

providing new insights into the operation of the global earth ocean atmosphere system and are now central to many areas of contemporary Quaternary research This comprehensive and dynamic textbook is richly illustrated throughout with full colour figures and photographs The book will be of interest to undergraduates postgraduates and professionals in Earth Science Environmental Science Physical Geography Geology Botany Zoology Ecology Archaeology and Anthropology **Conserving Peatlands** Lucy Parkyn, Rob E. Stoneman, Hugh A. P. Ingram, 1997 Peatlands are a unique and fast disappearing landscape More and more countries are recognizing this situation and putting protective legislation into place It is therefore important to understand all the processes and influences that are involved in sustaining the remaining examples of this fragile ecosystem Addressing two key questions why should peatlands be conserved and how should this conservation be achieved this book brings together the leading workers in the area whose contributions have been developed from the Peatlands Convention in Edinburgh The book summarizes the current situation regarding peatlands and bogs and sets the agenda for their future survival This work is important reading for all environmental scientists and practitioners working with peatlands and bogs The book is also relevant to all government policy makers and voluntary bodies involved in sustaining biodiversity

Wetlands of Ireland Marinus L. Otte, 2003 Ireland is famous or notorious for its wet and mild climate Because on average more water precipitates than evaporates the island is rich in wetlands marshes swamps fens bogs lagoons floodplains and wet meadows to name but a few Many place names in Ireland refer to wet places Words derived from the Irish language are used to refer to a particular type of wetland such as callows for the floodplains of the River Shannon or turlough for a type of ephemeral wetland found almost exclusively in Ireland This book brings together specialists in wetland science discussing a wide range of topics from an Irish perspective including the ecology fauna vegetation and distribution of various types of wetlands the use of wetlands for wastewater management the archaeology of wetlands and protection and conservation It is intended for a wide audience of wetland enthusiasts not just for professionals but also for those who through their hobbies have a passion for those wet and wild places **Peatlands, Economy and Conservation** M. G. C. Schouten, M. J.

Nooren, 1990 Contributions to the symposium Peatlands in perspective organised by WWF Staatsbosbeheer Natuurmonumenten and the Dutch Foundation for Conservation of Irish Bogs **Ireland** David Cabot, 1999 David Cabot an expert in his field provides a comprehensive view of all the different types of habitat to be found in Ireland from the peatlands and fens to the mountains and uplands from broad leaved woodland to coastal zones The book examines the history and ecology of each of these habitats and describes the rich variety of flora Peatlands International, 2012

Proceedings of the Royal Irish Academy, 1970 **Restoration of Ecosystems - Bridging Nature and Humans** Stefan Zerbe, 2023-02-13 In this interdisciplinary textbook which bridges the gap between the natural and social sciences both the scientific principles of restoration ecology and practical aspects of ecosystem restoration are comprehensively presented The diversity of land use types with a focus on Central Europe is highlighted and case studies of practical

restoration projects are presented The textbook offers students who deal with the environment as well as scientists and practitioners a profound and up to date but also critical overview of the state of knowledge This book opens up the broad spectrum of degraded ecosystems of Central European natural and cultural landscapes In further chapters marine ecosystems and their restoration as well as development potentials and the limits of restoration are discussed in more detail The ecological fundamentals are expanded through an interdisciplinary perspective taking into account environmental ethics sociology anthropology and economics In addition to an up to date overview of the various areas and fields of activity in restoration ecology and ecosystem restoration the textbook provides a valuable basis for studies science and practice The students also receive assistance in searching for literature and critical fact analysis and the lecturers on teaching formats and interdisciplinary approaches to discussion in restoration ecology

Ecological Assessment of Irish Lakes: Final report
The Environmental Protection Agency, 2001

Glasra, 1990

Ireland Through Birds Conor W. O'Brien, 2019-10-17

Twelve birds One country A wild Ireland waiting to be discovered In Ireland Through Birds Conor O'Brien takes the reader on an ornithological adventure around Ireland in search of twelve of our rarest and most elusive birds Along the journey the author explores every kind of landscape and habitat our island has to offer across all four seasons from the remote isles of Donegal to the rugged mountains of Kerry and urban parks of Dublin Through it all O'Brien is enchanted by calling corncrakes mesmerised by hunting harriers and chased by angry skuas It's a journey through a staggering array of landscapes that'll bring the reader face to face with the rich history and stunning wildlife to be savoured right on our doorstep It explores the stories of the remarkable birds that live here the genius of the jay the sublime mimicry of the cuckoo the nocturnal prowess of the barn owl while paying a moving poetic tribute to our natural heritage and a warning about the threats that face it Ireland Through Birds is a unique blend of natural history and travelogue making it a great read for anyone with an interest in Ireland's natural world

Irish Publishing Record, 1988

Restoration of Damaged Peatlands Bryan D. Wheeler, S. C. Shaw, 1995 This report is concerned largely with ombrotrophic peatlands mires irrigated directly and more or less exclusively by precipitation inputs ie rain snow fog etc and particularly with those known as raised bogs although some consideration is also given to restoration of fen peat workings The report provides guidance on the potential for the restoration of worked out or damaged bogs to regenerate maintain or increase their nature conservation value and on the possible approaches practicality and requirements that may be appropriate to facilitate this process It provides background information and scientific advice for formulating and implementing restoration strategies for the after use of currently worked or abandoned cut over bogs

The Enigmatic Realm of **The Ipcc Guide To Irish Peatlands**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic. Its capacity to stir emotions, ignite contemplation, and catalyze profound transformations is nothing lacking extraordinary. Within the captivating pages of **The Ipcc Guide To Irish Peatlands** a literary masterpiece penned with a renowned author, readers set about a transformative journey, unlocking the secrets and untapped potential embedded within each word. In this evaluation, we shall explore the book's core themes, assess its distinct writing style, and delve into its lasting affect the hearts and minds of those who partake in its reading experience.
