Skylark Of Space:

The Skylark of Space E. E. Smith, 2023-04-14 The Skylark of Space by E E Smith with the participation of Lee Hawkins Garby is a pioneering work in the science fiction genre exploring the concept of interstellar travel through the lens of early 20th century scientific understanding. The narrative begins with Dr Richard Seaton a brilliant chemist accidentally discovering a method to release the intra atomic energy of copper a force of unimaginable power. This discovery occurs when a copper steam bath used in his experiments inexplicably flies out of the window defying the known laws of physics. Seaton realizing the potential of his discovery resigns from his government position to pursue this groundbreaking research with the financial backing of his friend M Reynolds Crane. Seaton's work attracts the attention of Dr Marc DuQuesne a rival scientist who recognizes the potential of Seaton's discovery and seeks to exploit it for his own gain. DuQuesne approaches the World Steel Corporation proposing to steal Seaton's solution and develop the technology independently. However the corporation's head Brookings is cautious and decides to attempt the theft without DuQuesne's involvement underestimating the complexity and danger of the research. Meanwhile Seaton with Crane's support sets up a laboratory in Crane's home where he works tirelessly to understand and control the new force. His fiancée Dorothy Vaneman becomes concerned about his health due to his relentless work schedule. With Crane's encouragement she helps Seaton find a balance between his groundbreaking research and personal well being. The story is a blend of scientific exploration personal relationships and ethical dilemmas as Seaton and his allies navigate the challenges of harnessing a power that could change the course of human history. The novel sets the stage for future adventures as Seaton and Crane plan to build a spacecraft to explore the universe driven by the limitless energy of Seaton's discovery.

The Skylark of Space E.E. 'Doc' Smith, 2012-12-21 Brilliant government scientist Richard Seaton discovers a remarkable faster than light fuel that will power his interstellar spaceship The Skylark. His ruthless rival Marc DuQuesne and the sinister World Steel Corporation will do anything to get their hands on the fuel. When they kidnap Seaton's fiancee and friends they unleash a furious pursuit and ignite a burning desire for revenge that will propel The Skylark across the galaxy and back.
