**The Great Famine** Hourly History,2019-06-11 The Great Famine The Great Famine which afflicted Ireland from 1845 to 1849 was one of the most catastrophic events in Europe during the nineteenth century More than one quarter of the population of Ireland died of starvation or associated disease or were forced to emigrate Ireland after the famine was a completely

different country in many ways The direct causes of the famine are simple to understand a large part of the population of Ireland mainly the poorest families had become completely dependent on the potato as a source of food In 1845 the blight appeared a disease which affected the potato crop Successive failures of the potato crop in Ireland led to more than one million people dying as a direct result What is less easy to understand is why this famine was confined to Ireland and why the British government did not do more to help The potato blight affected parts of Great Britain and other countries in Europe

but nowhere else did it lead to famine For much of the famine food continued to be exported from Ireland and at its height there was food stored in warehouses which could have been used to alleviate the suffering of the starving that it was not represents at the very least a complete failure of understanding on the part of the British government Inside you will read about Farming in Ireland The Blight Arrives Full blown Famine Mass Emigration Poor Laws Revolt and the Return of the Blight Aftermath and Legacy And much more The Great Famine left a legacy of distrust and animosity between large segments of the population of Ireland and Great Britain and this in part led to the movements which finally produced Irish independence The famine also left a deep impression on the psyche of the people of Eire and even today Ireland remains at the forefront of international famine relief This is the story of the Irish Potato Famine **The Great Famine** John Gibney,2018 The Irish potato famine of the 1840s the Great Famine or An gorta m̄r is one of the defining events in modern Irish history Over a five year period a population of 8 2 million was reduced to 6 5 million through starvation disease and emigration The famine permanently changed one of the constituent parts of the United Kingdom as it then stood and its legacies of depopulation socio economic and cultural change political resentment and the expansion through mass emigration of an Irish diaspora in Britain North America and the British Empire still have a resonance today Now in the first installment of a new collaboration between Pen and Sword and History Ireland magazine some of the world s leading experts on the Great Famine explore the crisis from a range of perspectives From the importance of the potato in Irish history to food exports political change the provision of charity the impact of disease the role of the authorities the experience of emigration and the changing interpretation of the famine this volume explores how this seminal event in Irish British and world history still has a relevance to the globalised world of the twenty first century **The Irish Potato Famine** History
