Many researchers dread writing They find it laborious even painful to put their scholarly work into words They get bogged down in the study and lose track of the story And they produce uninspiring papers that fail to resonate with readers or reviewers This book offers an antidote to this problem brief accessible lessons that guide researchers to write clear and compelling scientific manuscripts The book is divided into three sections Story Craft and Community The Story section offers advice on getting the balance of study and story just right introducing strategies for tackling each section of a scientific manuscript The Craft section considers the grammatical and rhetorical tools of the trade showing how they can be wielded for maximum impact And the Community section offers suggestions for writing collaboratively supporting other writers and navigating peer review Each section features multiple short and pragmatic lessons peppered with illustrative examples Readers can use the chapters collectively to build holistic writing skills or dip in and out to refine specific elements of the craft Rooted in a coaching philosophy we aim to unlock our readers potential as writers through instruction reflection and example And we hope to inspire researchers to face writing with joy This work is clearly written and easily understandable Its many practical examples tools and exercises make an effective toolbox of support for scholarly writers This will be invaluable to new scholars and help established scholars as well The inclusion of examples specific to the health arena and the clear elegantly simple explanations add strength and relevance to this work Toni Ungaretti Johns Hopkins School of Education Baltimore MD USA This book is the most original perspective I have ever read about the craft of writing As its title suggests it is inspiring Brownie Anderson NBME Philadelphia PA USA **JOY OF WRITING JOURNAL** TENER.
