Although spas and improved well being have long been part of the tourist experience health tourism now includes travel for
medical purposes ranging from cosmetic and dental surgery through to transplants and infertility treatment Many countries
including China Cuba Hungary India Thailand Malaysia and Singapore actively promote and compete for the medical tourist
dollar while many developed countries also provide niche private services However the field of medical tourism is
increasingly being subject to scrutiny and debate particularly as a result of concerns over regulatory ethical and wider health
issues Drawing on a range of theoretical and methodological perspectives this book is one of the first to critically address the
substantial political philosophical and ethical issues that arise out of the transnational practices of medical tourism Through
a series of chapters the book engages with key issues such as the role of regulatory and policy structures in influencing
medical and health tourism related mobilities These issues are investigated by considering range of developing and
developed countries medical systems and health economic perspectives The book adopts a multi layered perspective to not
only investigate the business and marketing practices of medical and health tourism but places these within a broader
framework of contemporary globalisation policy and practice By doing so it opens up debate of the ethical space in which
medical and health tourism operates as well as reinforce the wide ranging perspectives that exist on the subject in both the
public and academic imagination This significant contribution will be of interest to students academics in tourism and
