**Industrial Relations in Small Firms** Al Rainnie, 2016-07-15 Originally published in 1989 this book analyses the economic and political position of the small firm in the 1980s and in particular the relationship between small and large firms in an advanced capitalist economy Focusing on the printing and clothing industries it examines the industrial relation practices in these two contrasting sectors and shows that apparent industrial relations harmony for example the lack of strikes should be put down to the powerlessness of the workforce rather than to contentment Routledge Library Editions:

**Women Entrepreneurs Across Racial Lines** Andrea Smith-Hunter, 2006-01-01 One of the strengths of this book lies in the admirable literature reviews throughout the volume The authors reviews vast amounts of literature on women entrepreneurs and more specifically studies involving women minority entrepreneurs The nature of this task should not be underestimated given the ever expanding academic field of entrepreneurship and women s entrepreneurship in particular I read this book as an academic and would argue that it is of most use for academics students and professors and provides an up to date and well researched portrait of women entrepreneurs in the USA and beyond this book fills an important gap in the literature not only because there is a growing population of women entrepreneurs but also because of the growing number of minority women entering entrepreneurship Jodyanne Kirkwood Women in Management Review This book serves an important purpose It draws attention to the need for further research on ethnic minority women entrepreneurs Anne de Bruin International Small Business Journal This monograph provides a very comprehensive study of women entrepreneurs in the US and in many industrialized and developing countries Recommended General readers all levels of students faculty and professionals E P Hoffman Choice In this book Andrea E Smith Hunter interweaves quantitative findings with qualitative depth resulting in an informative and objective report of explanatory variables differences and similarities among women entrepreneurs from unlike racial backgrounds Among others she develops models of human capital dimensions network structures and entrepreneurial success L o Paul Dana Journal of International Entrepreneurship

Women entrepreneurs command an increasingly large presence at the international and national levels. A significant part of this impact is due to growing numbers of minority women becoming entrepreneurs. This volume provides some of the most comprehensive data to date on the topic of women entrepreneurs across racial lines. It offers a systematic and conceptual framework for understanding issues of network structures and human and financial capital analyzed through a comparative analysis of minority and white women entrepreneurs. The book begins by looking at the historical and current contributions of women in the labor market as well as literature related to women entrepreneurs. Subsequent chapters take a critical and in depth look at white and minority entrepreneurs. Later chapters examine the status of women entrepreneurs in the US followed by various analyses of their position in the global marketplace. The book concludes with a set of action tools to aid women entrepreneurs as they navigate the road to economic success. Through a well chosen sample rich analysis and insightful accounts, Andrea E. Smith Hunter compellingly details the challenges and opportunities faced by women entrepreneurs in today's marketplace. Government agencies, researchers, entrepreneurs, and those involved with the financial aspects of entrepreneurial ventures will find this volume of great interest.

**Technology Choice** Kelvin W. Willoughby, 2019-07-09. This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments.

**Bosses in British Business** F. R. Jervis, 2018-04-17. In this volume first published in 1974, the author provides an introduction to the historical development of management in business. Success and failure in a commercial world can be explained partly in terms of economic forces but much also depends on the people on the management of the firms, on the bosses. The author approaches this topic by examining some of the major companies and individuals over the past two hundred years and examines how apparently secure and profitable companies at times run into great difficulties and shows that by examining the reasons for success and failure, pitfalls may be avoided and efficiency improved. This book will be of special value to business and commercial students as well as to the general reader who is interested in the problems of modern industry.

**Small Beginnings** Alan Bollard, 1983. Looks at the role of small firms and employment generating technologies in reviving the economy. Includes studies of brewing, printing, brick making, woollen textiles, plastic recycling, repair and servicing garages, and small scale cheese production.

**International Entrepreneurship** Sue Birley, 1995. This edited collection presents the latest research on the international aspects of entrepreneurship. The volume is divided into two sections. Part One looks at conceptual issues in entrepreneurship including discussion on trust and the entrepreneur, the importance of technology management, and the facets of new business growth. In Part Two, the discussion centres around a wide range of international case studies including the role of networking in Japan, foreign direct investment in research and development as entrepreneurship, and the brewing industry in the UK. The contributions illustrate the evolution of focus from the study of individual entrepreneurs, firms, and countries to the embedding of such players in the wider context of
