**Failures of Meteorology! Unable to Prevent Climate Change and World Wars?** Arnd Bernaerts,2012 The Second World War stands for the criminal madness of German Nazi government Less known is their responsibility for the only climatic shift from warm to cold in an otherwise constantly warming world over the last 150 years Not knowing the reason for the biggest climatic shift since industrialization which started in winter 1939 40 rectifies to speak about failures of meteorology Only four months into Second World War Northern Europe experienced the coldest winter in 100 years The reason plain physics Naval war in Northern European seas released the summer heat too quickly Polar air got free access to Europe The same applies to the second and third war winter Europe was back in the Little Ice Age After Japan attacked Pearl Harbor on Dec 7th 1941 naval war became a global affair In close conformity with naval war in European seas and subsequently in the Pacific a pronounced global cooling took place which lasted until about the mid 1970s Furthermore a thorough research of strong warming in the Northern Hemisphere from winter 1918 19 to winter 1939 40 would have revealed a convincing link to naval war in Europe from 1914 to 1918 But climatology does not care The connection between two naval wars and two climatic changes within 25 years has not yet been investigated and explained If they had warned governments about the threat of climate change as their successors currently do with the greenhouse effect naval activities in two World Wars may have been prevented or at least been limited Claims to understand climate should be regarded as a failure as long as meteorology is unable to explain the two most pronounced climatic shifts during the last century and the role two world wars had in this game These two events would show that the oceans have a dominate role in the climate system and man is able to change its direction by intensive activities in the marine environment It took four months to generate the extreme regional winter 19 **Port of London** ,1960 **National Union Catalog** ,1956 Includes entries for maps and atlases *Maritime History at the Crossroads* Frank Broeze,2017-10-18 This volume seeks to critically review the contemporary state of maritime historiography as it stands at the volume s publication date of 1995 The volume is comprised of thirteen essays each focused on the recent research into the maritime concerns of a particular geographical location listed as follows Australia Canada China Denmark Germany Greece Ibero America India the Netherlands the Ottoman Empire Spain the United States and a final chapter concerning historians and maritime labour in Britain Australia and New Zealand One concern made evident by the collection is the lack of stable identity and cohesive aims within maritime history the subject holds many conflicting definitions and concepts The purpose of this volume is to explore the recent developments in maritime history plus the growth of scholarly interest to provide a beacon and stimulus for future work and to clearly direct

and define maritime historiography toward a solid position in the field of history **The U-Boat War in the Atlantic, 1939-1941** Bob Carruthers,2013-03-18 First in the trilogy that covers WWII submarine warfare in the Atlantic from the German perspective edited by the Emmy Award winning historian and author The U Boat war is a unique visual record of Hitler's infamous submarine fleet and a grim account of those that lived worked and risked their lives stalking the depths of the Atlantic and Mediterranean seas This book analyzes the development of the U boat the recruitment and training and reveals how the crews tried to destroy essential Allied supplies across the Atlantic and bring Britain to its knees Using some 250 rare and unpublished photographs together with detailed captions and accompanying text the book provides an outstanding insight into the various operations and the claustrophobic existence of the crew where they lived in cramped and often deplorable conditions It depicts how this potent force became one of the most dominant German fighting units during World War Two and became such a worry to Allied shipping that even Winston Churchill himself claimed that the U boat peril was the only thing that ever really frightened him during the war On their defeat hung the outcome of the war and through courageous and determined resistance against overwhelming odds the Allies eventually inflicted such catastrophic damage on the U boats that the losses were too great to continue Of the 38 000 men that went to sea onboard these deadly vessels only 8 000 were to survive to tell the tale
