The American Political Scandal David R. Dewberry, 2015-08-13 In this holistic examination of political scandal in the United States David Dewberry argues convincingly that such scandals follow a consistent narrative centered largely on media coverage and politician performance rather than the actual corruption or ethics violation committed In making this argument he also provides an analytical framework for understanding the patterns underlying scandals regardless of their unique political contexts Dewberry dissects four major examples Teapot Dome Watergate Iran Contra and Clinton Lewinsky and explores the roles of various constituencies involved in creating reacting to and mediating the scandal What is the true role of journalism within the context of scandal What persuasive techniques do politicians employ to develop and perpetuate scandals What motives and values bring scandals to a close In addition to the core cases Dewberry incorporates briefer examples from contemporary and ongoing controversies including Anthony Weiner s sexting scandal money and sex in Congress how cover ups have gone digital and Chris Christie s Bridgetate The result is a fascinating and thoughtful look at the relationships among political discourse free speech and democracy The Smoking Gun William Bastone, Daniel Green, Barbara Glauber, 2001

Considered Judgment Catherine Z. Elgin, 1999-02-01 Philosophy long sought to set knowledge on a firm foundation through derivation of indubitable truths by infallible rules For want of such truths and rules the enterprise foundered Nevertheless foundationalism s heirs continue their forbears quest seeking security against epistemic misfortune while their detractors typically espouse unbridled coherentism or facile relativism Maintaining that neither stance is tenable Catherine Elgin devises a via media between the absolute and the arbitrary reconceiving the nature goals and methods of epistemology In *Considered Judgment* she argues for a reconception that takes reflective equilibrium as the standard of rational acceptability A system of thought is in reflective equilibrium when its components are reasonable in light of one another and the account they comprise is reasonable in light of our antecedent convictions about the subject it concerns Many epistemologists now concede that certainty is a chimerical goal But they continue to accept the traditional conception of epistemology s problematic Elgin suggests that in abandoning the quest for certainty we gain opportunities for a broader epistemological purview one that comprehends the arts and does justice to the sciences She contends that metaphor fiction emotion and exemplification often advance understanding in science as well as in art The range of epistemology is broader and more variegated than is usually recognized Tenable systems of thought are neither absolute nor arbitrary Although they afford no guarantees they are good in the way of belief *The Smoking Gun* Malcolm Rose, 1993
