Slovar Voennykh Terminov:

The Soviet Army's High Commands in War and Peace, 1941-1992 Richard W. Harrison, 2022-07-28 The first full history of the Soviet Army's High Commands during World War II and the Cold War Provides valuable and original research that reveals a great deal about the Soviet Union's military command structure during World War II with a few important insights into the almost fifty years that followed Journal of Military History The war on the Eastern Front during 1941-45 was an immense struggle running from the Barents Sea to the Caucasus Mountains The vast distances involved forced the Soviet political military leadership to resort to new organizational expedients in order to control operations along the extended front These were the high commands of the directions which were responsible for two or more fronts army groups and along maritime axes one or more fleets In all five high commands were created along the northwestern western southwestern and North Caucasus strategic directions during 1941-42 However the highly unfavorable strategic situation during the first year of the war as well as interference in day to day operations by Stalin severely limited the high commands effectiveness As a consequence the high commands were abolished in mid 1942 and replaced by the more flexible system of supreme command representatives at the front A High Command of Soviet Forces in the Far East was established in 1945 and oversaw the Red Army's highly effective campaign against Japanese forces in Manchuria The Far Eastern High Command was briefly resurrected in 1947 as a response to the tense situation along the Korean peninsula and the ongoing civil war in China but was abolished in 1953 soon after Stalin's death Growing tensions with China brought about the recreation of the Far Eastern High Command in 1979 followed a few years later by the appearance of new high commands in Europe and South Asia However these new high commands did not long survive the collapse of the Soviet Union in 1991 and were abolished a year later The book relies almost exclusively on Soviet and post communist archival and other sources and is the first unclassified treatment of this subject in any country East or West

Operational And Strategic Lessons Of The War In Afghanistan, 1979-1990 Dr Stephen J. Blank, 2014-08-15 The Soviet invasion of Afghanistan at the end of 1979 was in many respects a milestone in Soviet history On the one hand it represented the high water mark of Soviet intervention in Third World states and thus served as the archetypical example and justification for the intensification of the cold war in the early 1980s On the other hand the ultimate defeat and poor performance by this military in Afghanistan was one of the key forces that triggered the drive for a comprehensive reform of the entire Soviet national security system and its decision making structures Thus this war had profound domestic and foreign repercussions This analysis focuses on the purely operational and strategic lessons of the war It insists that lessons of these kinds were present and that they offer significant insights both for such wars in general and for the course of Soviet military developments in the 1980s and 1990s These lessons also offer important clues concerning the reforms required in order to preserve democratic civilian control over the military It should also alert analysts everywhere as to the nature of local wars in the Third World in the 1990s a phenomenon that shows little sign of

abating Though in many ways like all wars this war was unique it was not merely a series of random tactical exercises that were ultimately futile Rather like all wars it shows us something of the shape of our present and future if we are only insightful enough to understand it correctly

The Russian Way of War Richard W. Harrison,2001 In this first comprehensive treatment of the subject Richard Harrison shows how this theory emerged and developed to become despite radically different political settings and levels of technology essential to the Red Army s victory over Germany in World War II

Soviet Military Doctrine John Yin,1980

The Soviet Armed Forces, 1918-1992 John Erickson,Ljubica Erickson,1996-02-06 In a compact guide to essential sources this bibliography covers the Soviet armed forces from the birth of the Red Army and the origins of the Soviet military system to the demise of the Soviet Union The authors have selected over 1 400 titles that accommodate both wider interests and those of the specialist Taking accessibility into account they have provided a wealth of information on sources available in the West The bibliography opens with a section on reference sources and the imperial antecedents to the Soviet system Part Two includes chapters on the Revolution and Civil War the period from 1922 1940 and the Great Patriotic War of 1941 1945 In the concluding section the authors cover the postwar period The final chapter Breakthrough Books includes those works that have radically influenced the perception and discussion of Soviet military affairs

The Petrine Revolution in Russian Culture James Cracraft,2009-07-01 The reforms initiated by Peter the Great transformed Russia not only into a European power but into a European culture a shift argues Cracraft that was nothing less than revolutionary The author of seminal works on visual culture in the Petrine era Cracraft now turns his attention to the changes that occurred in Russian verbal culture

Afghanistan And Beyond: Reflections On The Future Of Warfare Dr Stephen J. Blank,2014-08-15 Many military analysts believe or fear that the wars of the 1990s will be akin to the wars in the former Yugoslavia small scale but long lasting and recurrent ethnic wars that also elude easy international resolution There are consequently well founded concerns about prospects for deployment of U S forces there in a unilateral or U N capacity Some of the lessons of this kind of war were already apparent in the wars of the 1980s They were known then as low intensity conflicts and now as operations other than or short of war This report focuses mainly on lessons from one of the most crucial of these wars i e in Afghanistan as a result of the Soviet invasion in 1979 and attempts to draw lessons that are relevant for current wars like those in Yugoslavia or the ex Soviet Union The purpose is to stimulate analysis and reflection on the strategic and operational if not also tactical nature of these wars by both analysts and policymakers so that all interested groups can more easily come to terms with a form of warfare that promises to be both deeply destructive and deeply rooted in longstanding political and social antagonisms that cannot be easily or quickly resolved Naturally some of the lessons drawn from Afghanistan and other wars may either only apply to Russian and Soviet forces or conversely may apply to war in general But our primary intention is to make a contribution to

the study of future wars particularly of the ethnic and small scale type that promise to continue in many parts of the globe
