Slow Virus Diseases:

Slow Viruses David H. Adams, Thomas Matthew Bell, 1976 **Slow Virus Diseases** John Hotchin, 1974 **Slow Virus Infections of the Central Nervous System** V. ter Meulen, M. Katz, 2013-11-11 Workshop on Slow Virus Infections University of Würzburg March 24-26 1975 The Enigma of Slow Viruses Pawel P. Liberski, 2012-12-06 Scrapie a naturally occurring neurodegenerative disease of sheep and sometimes goats is a prototypic disease for the whole group of the subacute spongiform virus encephalopathies Kuru was the first human disease of this type to be discovered in 1957 by Gajdusek and Zigas and its discovery opened the whole field in the human biomedical sciences by the very realization of the fact that viruses may induce disease months or even decades after infections and that these slow virus diseases are more compatible with classical degenerations of the nervous system than with inflammatory disorders of the brain More than a quarter of a century since discovery of Kuru and more than half a century following the first transmission of scrapie the very nature of the infectious virus remains unknown This comprehensive review covers all aspects of slow unconventional virus infections known today It includes numerous historical data biochemistry and molecular biology of the prion protein and its gene the role of genetics and mutations within PrP gene spreading and targeting of the virus biochemistry and neurochemistry of the alterations of different neurotransmitter system and neuropathology More than 1000 references are listed and critically analyzed the reader can find references to all experiments and laboratory findings which has ever been done in this field Furthermore the book offers different view on the basic problems as for example the nature of the scrapie agent *Slow Virus Diseases of Animals and Man* R. H. Kimberlin, 1976 **Persistent and Slow Virus Infections** J. Hotchin, 1971-04-27 *Aspects of Slow and Persistent Virus Infections* D.A.J. Tyrrell, 2012-12-06 This book records the papers and discussions at a Workshop which took place in London on the 5th and 6th of April 1979 as part of the programme of the Commission of the European Communities on Medical and Public Health Research However the views expressed are those of the individuals concerned and not of the EEC or any of its organs The object was to discuss certain biological aspects of natural and experimental slow virus infections Because the amount of knowledge and the focus of interest varied in respect of each infection the approach and emphasis varied also In the case of scrapie we discussed the nature of the agent and the mode of pathogenesis in the case of SSPE the search for unusual features of the virus and recent detailed work on the immunology of the disease As for Visna we reviewed the present understanding of the virus and its pathogenicity and also field epidemiology and methods for its control There were also general papers on interferon and oncornaviruses for example We thank all those who made the meeting possible and enabled us to produce this book quickly so that those who could not attend the meeting may nevertheless be able to read a great deal of what went on at it In particular we would thank the Ciba Foundation who allowed us the use of their premises and Mrs Jean Ashley who dealt with most of the arrangements **Slow Virus Infections** Vladimir Dmitrievich Timakov, Viktor Abramovich Zuev, 1980 **Slow Virus Diseases** American
