Designing Small Parks Ann Forsyth, Laura Musacchio, 2005-10-24 *Designing Small Parks A Manual for Addressing Social and Ecological Concerns* provides guidelines for building better parks by integrating design criteria with current social and natural science research. Small parks are too often relegated to being the step child of municipal and metropolitan open space systems because of assumptions that their small size and isolation limits their recreational capacity and makes them ecologically less valuable than large city and county parks. This manual is arranged around twelve topics that represent key questions, contradictions or tensions in the design of small parks. Topics cover fundamental issues for urban parks, natural systems and human aspects. Also included are useful case studies with alternative design solutions using three different approaches for integrating research findings into small urban park design.

Interchanges of Insects between Agricultural and Surrounding Landscapes B.S. Ekbom, Michael E. Irwin, Y. Robert, 2000-01-31 The chapters in this book were developed from some of the lectures presented at a symposium at the XX International Congress of Entomology held in Florence, Italy, in August 1996. The purpose of the symposium was to discuss the impact of evolving modern agricultural landscapes on the insect species of both economic and ecological importance that utilize that habitat. Agricultural policy to some extent influences the choices that farmers make and thereby the shape of the agricultural landscape. In order to move toward more sustainable agro ecosystems, future policy makers will have to consider the history of land use, consumer demands for both environmentally sound and affordable products and the conservation of biological diversity. I would hope the information contained in this book will help stimulate discussion about the consequences of policy decisions on our agricultural landscapes and their insect inhabitants. I thank all the speakers from the symposium and in particular those that have been able to contribute chapters to this book. There have been many delays, most due to circumstances beyond anyone's control. I would like to express my appreciation to Gloria Verhey and Patrick Dumont for taking care of the book in these final months.
