

"Canst thou guide Arcturus with his sons?"

Garrett P. Serviss wrote:

Arcturus, one of the greatest suns in the universe, is a runaway whose speed of flight is 257 miles per second. Arcturus, we have every reason to believe, possesses thousands of times the mass of our sun. Think of it! Our sun is traveling only 12 $\frac{1}{2}$ miles a second, but Arcturus is traveling 257 miles a second. Think then of the prodigious momentum this motion implies.

Charles Burckhalter, of the Chabot Observatory said"

This high velocity places Arcturus in that very small class of stars that apparently are a law unto themselves. He is an outsider, a visitor, a stranger within the gates; to speak plainly, Arcturus is a runaway. Newton gives the velocity of a star under control as not more than 25 miles a second, and Arcturus is going 257 miles a second. Therefore, combined attraction of all the stars we know cannot stop him or even turn him in his path.

Mr. Burckhalter after being shown the text in the book of Job said:

The study of the Book of Job and its comparison with the latest scientific discoveries has brought me to the matured conviction that the Bible is an inspired book and was written by the One who made the stars.

The wonders of God's universe never cease to amaze us. Arcturus and his sons are individual runaway suns that seem to be out of orbit in our galaxy. Traveling at such incredible speeds, why don't they crash with other suns or planets? Where are they headed? Only God knows. God is guiding them.
