## **Studied Madness:**

*A Studied Madness* Heywood Hale Broun, 2015-05-12 Brought back into print after 14 years and published in paperback for the first time this leisurely meditation on the art of acting and on the author's life in that art demonstrates a good natured sense of humor and an engaging style. In a series of essays Broun gently knocks the theatrical world the audience traveling from small town to small town only to have a production fold right outside of New York the trauma of doing live TV getting bit parts in commercials or horror movies after years of classical training and so on. Oddly enough while deglamorizing his profession he makes a good case for it he enjoyed his life and he's written a very enjoyable book about it. Publisher's Weekly

**Derrida's Social Ontology** Ryan A. Gustafson, 2023-12-01 Derrida's Social Ontology Institutions in Deconstruction presents the first dedicated study of Jacques Derrida's philosophy of institutions. While previous studies of Derrida's thought have considered his engagement with individual institutions from the university to literature law and psychoanalysis among others Derrida's Social Ontology offers the first attempt to reconstruct and defend the philosophical theory of institutions that underlies these engagements. In so doing the book argues that the theme of the institution in Derrida's oeuvre offers the best throughline for understanding the substantively normative significance of deconstruction as a philosophical practice arguing that Derrida is unique among so called postmodern thinkers in providing an account of the relationship between the historically contingent character of institutions and the normative entitlements that such entities make possible. Specifically the book shows how Derrida accounts for this relationship in a way that leaves room for a notion of unconditional responsibility for the social and political world to the extent that the latter is structured by perfectible institutions. In tracing the development of Derrida's account of this link between the historicity and normativity of institutional life from his early writings on the historicity of the institution of philosophy to his later critiques of practices of institutional cruelty like the death penalty Derrida's Social Ontology not only offers readers a new framework for making sense of the normative commitments that defined this philosopher's writings but will also establish the terms for putting his works into conversation with contemporary debates in social and political philosophy and critical theory more broadly

**Helena Faucit (Lady Martin)** Sir Theodore Martin, 1900 **Towards a Poetics of the Mental Health Play** Anja Drautzburg, 2020 This study traces key developments in theatre's engagement with mental health since the 1970s. It introduces and applies the concept of the mental health play as accurate and timely in addressing the way mental distress and mental illness have been brought to the stage. The study argues that the theatre is a central calibrator for reflecting developments and tensions in as well as attitudes towards mental health care and thus opens up a domain that still has stereotypes and myths attached to it. Theatre's representations of mental distress inform and shape cultural production and vice versa. Mental health plays are central in encouraging and fostering conversations about mental health and they thus intervene in ongoing debates. Due to its interdisciplinary approach this study contributes to and extends existing research in multiple fields including theatre and
