Studies In Human Capital:

Human Capital Gary S. Becker, 2009-05-15 Human Capital is Becker's classic study of how investment in an individual's education and training is similar to business investments in equipment. Recipient of the 1992 Nobel Prize in Economic Science. Gary S. Becker is a pioneer of applying economic analysis to human behavior in such areas as discrimination, marriage, family relations, and education. Becker's research on human capital was considered by the Nobel committee to be his most noteworthy contribution to economics. This expanded edition includes four new chapters covering recent ideas about human capital, fertility, and economic growth; the division of labor; economic considerations within the family; and inequality in earnings. Critics have charged that Mr. Becker's style of thinking reduces humans to economic entities. Nothing could be further from the truth. Mr. Becker gives people credit for having the power to reason and seek out their own best destiny. *Wall Street Journal* *Investment in Human Capital* Theodore W. Schultz, 1971 **Human Capital** Gary Stanley Becker, 1993

Human Capital Joop Hartog, Henriëtte Maassen van den Brink, 2007-06-28 At a time when governments and policy makers put so much emphasis on the knowledge economy and the economic value of education, human capital theory has never been more important. However, research in this area is often very technical and therefore not easily accessible to those who wish to use it as a guide to policy formation. This book provides an interface between such research and its potential applications in government, education, and business. Reporting on a major research initiative, new findings are presented in a non-technical way on three major themes: measuring the benefits from human capital applications of the human capital model and policy interventions. Aimed at academic researchers and professionals concerned with the problems and techniques of human capital theory, it will also be useful for graduate courses on the economics of education to complement standard textbooks.

Studies in Human Capital Jacob Mincer, 1993-01-01 The books should be bought by every university library. The research reported here is important: the exposition is lucid, the sequencing of chapters is sensible, and the retrospective aspect of the volumes provides a fascinating insight into the working methods of one of the great economists of our time. Geraint Johnes' International Journal of Manpower Studies in Human Capital, the first volume of Jacob Mincer's essays to be published in this series, assesses the impact of education and job training on wage growth. It offers an authoritative study of the effects of human capital investments on labor turnover and the impact of technological change on human capital formation.

The Death of Human Capital? Phillip Brown, Hugh Lauder, Sin Yi Cheung, 2020-09-11 Human capital theory or the notion that there is a direct relationship between educational investment and individual and national prosperity has dominated public policy on education and labor for the past fifty years. In *The Death of Human Capital*, Phillip Brown, Hugh Lauder, and Sin Yi Cheung argue that the human capital story is one of false promise: investing in learning isn't the road to higher earnings and national prosperity. Rather than abandoning human capital theory, however, the authors redefine human capital in an age of smart machines. They present a new human capital theory that rejects the view that automation and AI

will result in the end of waged work but see the fundamental problem as a lack of quality jobs offering interesting worthwhile and rewarding opportunities A controversial challenge to the reigning ideology The Death of Human Capital connects with a growing sense that capitalism is in crisis felt by students and the wider workforce shows what's at stake in the new human capital while offering hope for the future

Human Capital Gary S. Becker,1993-01 Human

Capital is Becker's study of how investment in an individual's education and training is similar to business investments in equipment. Becker looks at the effects of investment in education on earnings and employment and shows how his theory measures the incentive for such investment as well as the costs and returns from college and high school education. Another part of the study explores the relation between age and earnings. This edition includes four new chapters covering recent ideas about human capital, fertility and economic growth, the division of labour, economic considerations within the family and inequality in earnings.

Human Capital and Economic Growth Alberto Bucci, Klaus Prettner, Alexia

Prskawetz, 2019-11-26 This edited collection explores the links between human capital both in the form of health and in the form of education, demographic change and economic growth. Measuring Human Capital Barbara Fraumeni, 2021-07-12

Measuring Human Capital addresses a country's most important resource: its own people. Bettering human capital benefits individuals and their country and leads to improved sustainability for the future. For many years, economists only used Gross Domestic Product (GDP) to acknowledge this to be inadequate without supplemental measures to gauge a country's overall value. There is now a recognition that many variables contribute to a country's worth, which make accurate measurement difficult. Looking beyond GDP by focusing on human capital, researchers, policymakers, government officials and students can understand what elements impact human capital and how they might improve it in order to increase economic growth and well-being. Addresses six major measures of
