Studies In The Vernon Manuscript:

Studies in the Vernon Manuscript Derek Albert Pearsall, 1990 The Vernon manuscript is the largest and in many ways the most important vernacular manuscript of medieval England. Produced in the West Midlands in the late 14th century at a time when English was in the process of consolidating its hold over Latin and Anglo Norman as the dominant literary language it contains a mass of religious writing of all kinds from pious romances and fables to technical and quasi mystical treatises. It was in the intention of its makers a guide to the soul's health and is to the modern reader an incomparable index to late medieval English spirituality and religious ideas. The publication of a facsimile of the manuscript in 1987 was a mark of its significance for all those who study the English Middle Ages.

Reading English Verse in Manuscript c.1350-c.1500 Daniel Sawyer, 2020-05-21 *Reading English Verse in Manuscript c.1350-c.1500* is the first book length history of reading for later Middle English poetry. While much past work in the history of reading has revolved around marginalia this book consults a wider range of evidence from the weights of books in medieval bindings to relationships between rhyme and syntax. It combines literary critical close readings detailed case studies of particular surviving codices and systematic manuscript surveys drawing on continental European traditions of quantitative codicology to demonstrate the variety vitality and formal concerns visible in the reading of verse in this period. The small and large scale formal features of poetry affected reading subtly but extensively determining how readers might move through books and even shaping physical books themselves. Readers responses to one formal feature rhyme meanwhile evince a habitual but therefore deep rooted formalism which can support and enhance close readings today. *Reading English Verse in Manuscript* sheds fresh light on poets such as Geoffrey Chaucer John Lydgate and Thomas Hoccleve but also shows how their works were read in manuscript in the context of a much larger mass of anonymous poems that influenced canonical poems in a pattern of mutual influence.

Media

Technologies and the Digital Humanities in Medieval and Early Modern Studies Katharine D. Scherff, Lane J. Sobehrad, 2023-03-17 Through a multidisciplinary collection of case studies this book explores the effects of the digital age on medieval and early modern studies. Divided into five parts the book examines how people medieval and modern engage with medieval media and technology through an exploration of the theory underpinning audience interactions with historical materials in the past and the real world engagement of a twenty first century audience with medieval and early modern studies through the multimodal lens of a vast digital landscape. Each case study reveals the diversity of medieval media and technology and challenges readers to consider new types of literacy competencies as scholarly rigorous methods of engaging in pre modern investigations of materiality. Essays in the first section engage in the examination of medieval media mediation and technology from a theoretical framework while the second section explores how digitization smart technologies digital mapping and the internet have shaped medieval and early modern studies today. The book will be of interest to students in undergraduate or graduate intermediate or advanced courses as well as scholars in medieval studies art history architectural
