## **Studies On Reduplication:**

Studies on Reduplication Bernhard Hurch, 2011-12-22 For several reasons mostly inherent to the different developments of generative grammar an increasing number of publications have dealt with reduplication in the past 20 years Reduplication lends itself perfectly as a test field for theories that opt for a non segmental organization of phonology and morphology As it happens frequently then the discussion centers around a rather small set of data for which alternative analysis are offered and which themselves are intended to contribute to the foundation of new theoretical developments The present volume which goes back to a conference on reduplication at the University of Graz Austria offers a broader approach to reduplication not only from different theoretical viewpoints but especially for its phenomenology Across theories a number of highly qualified authors deal with formal and functional perspectives with typological properties with semantics comparative issues the role of reduplication in language acquisition the acquisition of reduplicative systems sign languages creoles and pidgins general grammatical and cognitive principles the picture is completed by a series of language or language family specific studies as on Uto Aztecan Salish Tupi Guarani Moroccan and Cairene Arabic various African languages Chinese Turkish Indo European languages from India etc The overall scope of the conference was to contribute to a new level of discussion of the phenomenon across theories and across specializations and interests Update on Contributor s addresses PDF

Reduplication Sharon Inkelas, Cheryl Zoll, 2005-02-24 This groundbreaking new study takes a novel approach to reduplication a phenomenon whereby languages use repetition to create new words Sharon Inkelas and Cheryl Zoll argue that the driving force in reduplication is identity at the morphosyntactic not the phonological level and present a new model of reduplication Morphological Doubling Theory that derives the full range of reduplication patterns This approach shifts the focus away from the relatively small number of cases of phonological overapplication and underapplication which have played a major role in earlier studies to the larger class of cases where base and reduplicant diverge phonologically The authors conclude by arguing for a theoretical shift in phonology which entails more attention to word structure As well as presenting the authors pioneering work this book also provides a much needed overview of reduplication the study of which has become one of the most contentious in modern phonological theory **A Typological Study of Reduplication as a**

**Morpho-semantic Process** Setsuko Kiyomi, 1993 *The Phonology and Morphology of Reduplication* Eric Raimy, 2012-10-25 This book proposes a new representational analysis of reduplication based on making explicit precedence relations in phonological representations The main claim is that reduplication results from loops in the precedence structure of phonological representations Modular rule based analyses of overapplication and underapplication effects including backcopying are presented to argue against the McCarthy and Prince 1995 claim that a derivational model of reduplication is conceptually and empirically inadequate Other sections of the book discuss the implications of explicit precedence information for the concatenation of morphemes the analysis of infixation and templates in reduplication Analyses of relevant

phenomena from Indonesian Tohono Oodham Chaha Chumash and Nancowry among other languages are provided **The Use of Databases in Cross-linguistic Studies** Martin Everaert, Simon Musgrave, Alexis Dimitriadis, 2009 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics Studies in the Syntax and Semantics of the Reduplicated Presents of Homeric Greek and Indo-European Giorgios K. Giannakis, 1997 **Studies in the Linguistic Sciences**, 1997 Also issued online Form and Meaning in Word Formation Rudolf P. Botha, 1988 This study of reduplication in Afrikaans provides a unified and principled analysis of an unusual and highly complex word formation process shedding new light on the scope and content of various fundamental lexicalist principles of word formation **The Journal of Indo-European Studies**, 1999 **Studies in History, Economics, and Public Law**, 1891 *Visible Variation* Pamela M. Perniss, Roland Pfau, Markus Steinbach, 2008-09-25 It has been argued that properties of the visual gestural modality impose a homogenizing effect on sign languages leading to less structural variation in sign language structure as compared to spoken language structure However until recently research on sign languages was limited to a number of Western sign languages Before we can truly answer the question of whether modality effects do indeed cause less structural variation it is necessary to investigate the similarities and differences that exist between sign languages in more detail and especially to include in this investigation less studied sign languages The current research climate is testimony to a surge of interest in the study of a geographically more diverse range of sign languages The volume reflects that climate and brings together work by scholars engaging in comparative sign linguistics research The 11 articles discuss data from many different signed and spoken languages and cover a wide range of topics from different areas of grammar including phonology word pictures morphology pronouns negation and auxiliaries syntax word order interrogative clauses auxiliaries negation and referential shift and pragmatics modal meaning and referential shift In addition to this the contributions address psycholinguistic issues aspects of language change and issues concerning data collection in sign languages thereby providing methodological guidelines for further research Although some papers use a specific theoretical framework for analyzing the data the volume clearly focuses on empirical and descriptive aspects of sign language variation *Mon-Khmer Studies*, 2006 **Studies in Classical Philology** University of Chicago, 1895 **Papers on Child Phonology, 1963-1983** Charles Albert Ferguson, 1984 *Studies in Micronesian Linguistics* Byron W.
