Semantic Interpretation in Generative Grammar Ray S. Jackendoff, 1980 **Generative Grammar in Europe** F. Kiefer, N. Ruwet, 2012-12-06 The present volume is intended to give an overall picture of research in progress in the field of generative grammar in various parts of Europe The term generative grammar must however be understood here rather broadly What seemed to be an easily definable technical term several years ago is becoming more and more vague and imprecise Research in generative grammar is carried on according to rather diversified methodological principles and being a generative grammarian is often more a matter of confession than any adherence to the common line of methodology which can be traced back to the conception of grammatical description initiated by Noam Chomsky The direct or indirect influence of this conception is however clearly recognizable in most of the papers of this volume The most difficult thing was naturally enough to select appropriate papers in the realm of semantics Apart from the special trend in generative grammar referred to as generative semantics though here too we might ponder on what generative really means the term generative is hardly employed in semantics The search for semantic primes the application of the methods of mathematical logic the inquiry into the intricate relationships between syntax and semantics and the utilization of syntactic information in semantics are perhaps the most characteristic traits of contemporary semantics All of this of course is at no variance with the principles of generative grammar on the contrary most of it has been made possible through the achievements of generative grammar

Studies in Syntax and Semantics F. Kiefer, 2012-12-06 In the last decade a profound change has occurred in linguistic science Not only have old problems been tackled from an entirely new point of view but also quite a few new fields of linguistic research have been opened The common characteristic of the majority of the theories and methods developed recently is the search for a more adequate description of language Adequacy does not mean simply that the theory must conform to the facts It must also meet the general requirements of present day theories coherence clear cut notions rigor of presentation It has also become abundantly clear that linguistic research cannot be content with the registration and classification of linguistic phenomena In one way or another linguistics must try to explain the deep seated regularities in

language which in general do not appear on the surface in some straightforward way Therefore we find the attribute deep very often in contemporary linguistic literature Linguistic theories seek an explanation for the observed facts in terms of a system of hypotheses about the functioning of language As research proceeds these will undergo essential changes Some of them will be waived others complemented The papers of the present volume follow these general principles of linguistic theory though they may differ from each other in the way of presentation considerably Some of the papers make use of the framework of transformational generative grammar e g Kuroda Perlmutter others approach the pertinent problem from a different angle e g Dupraz and Rouault Apresyan Mel'cuk and Zolkovski **Studies in Language** ,1999 *The Prague Bulletin of Mathematical Linguistics* ,2004 **Grammar and Semantics of Adnominal Clauses in Japanese** Yoshiko Matsumoto,1989 **International Journal of Dravidian Linguistics** ,1974 **Linguistics** ,1979 Current Index to Journals in Education ,1980
